Because minor illnesses and injuries can happen at any time ...

It’s late in the afternoon, and your child falls off his bike. You fear his arm may be broken. And his pediatrician’s office is closed.

We are nearby to help.

We have five convenient Urgent Care Centers that are open nights, weekends and holidays. No appointment is needed.

Because your child is not a small adult ...

Unlike retail clinics, our doctors and nurses are specially trained to treat children and teens.

And you need peace of mind.

Lab tests and X-rays are done at the Urgent Care Center during the same visit to quickly diagnose your child. We then send that information to your child’s doctor.

Our pediatricians are standing by.

Lab & X-ray services onsite
