

## General Overview

Children's Healthcare of Atlanta created a community health record program to enhance patient care. Pediatrics360, and its accompanying electronic health record (EHR) system, can help improve the region's medical services and help physicians meet the future demands of the healthcare industry by connecting our region's providers with a clinically integrated network of care.

Fully compliant with Health Insurance Portability and Accountability Act (HIPAA) and federal regulations, Pediatrics360 is certified by the Office of the National Coordinator for Health Information Technology (ONC) and offers:

- Up-to-date medical records for patients
- Electronic prescriptions
- Efficient practice management
- Private and secure practice data

### Pediatrics360 advantages

There are a multitude of reasons to implement Pediatrics360 into your practice, some of which include:

#### **Real-time collaboration for patient care**

- Review and enter up-to-date information on current medications and dosages
- See allergy notifications in the EHR automatically
- Place orders for labs and radiology, and view results with easy-to-read notes
- Access integrated patient records, sharing a patient's history with other Pediatrics360 providers, including hospital, specialists and pediatricians

#### **Greater coordination for your practice**

- Spend less time calling to request charts, verify patient information or get test results
- Reduce repetitive tests
- Improve practice management with a streamlined charge capture process

#### **Better for your patients**

- Test results communicated faster
- Decreased risk of medication errors
- Eliminate the need for the patient to fill out repetitive forms each visit
- Store patient information, ensuring it is not lost from one physician to another
- Access a more complete medical history and promote better outcomes

## **Support**

Because we understand that a large technological change like this can be overwhelming, our IT support team is here to help you. We provide:

- Practice demos
- Training
- Application/hardware testing
- Downtime procedures
- Launch assistance and ongoing support
- Future optimization and upgrades

## **About the EHR**

Pediatrics360 utilizes Epic, which has been ranked the No. 1 ambulatory EHR system for 12 years running.\* The Epic platform is an integrated solution that serves all settings of care in a single software environment and enables seamless sharing of important patient data.

Epic makes software for mid-size and large medical groups, hospitals and integrated healthcare organizations – working with customers that include community hospitals, academic facilities, children's organizations, safety net providers and multi-hospital systems. Epic's integrated software spans clinical, access and revenue functions.

Founded in 1979, Epic is private and employee-owned. Epic develops all applications in-house. Epic's leadership team includes clinicians, developers and process experts – people deeply experienced in patient care and healthcare technology.

*\*Ranked by KLAS, an independent, third-party evaluating agency that has been described as the Consumer Reports of Healthcare Information Technology.*
