

TANDBERG Intern MXP

Combining a TANDBERG set-top or Edge with an IV stand, the TANDBERG Intern MXP is ideal for applications that require a portable, self-contained video solution, such as healthcare, emergency response, homeland security and manufacturing.

While no currently available technology can completely substitute for the in-person physical examination of an individual patient or specimen, the TANDBERG Intern II provides high quality, high resolution long distance images. The Intern II can provide a significant and valuable tool for physicians and other medical professionals who are unable to examine a patient or specimen in person. The use and value of the system will vary depending on the specific circumstances of the patient's condition. Ultimately judgments on how this tool should be employed must be in the individual discretion of the physician supervising the patient's care.

DESIGN FEATURES

- 24" 16:9 Flat Screen LCD Display
- Slim mobile unit with shelf and basket for convenient connection of peripherals such as a laptop, medical imaging equipment and additional cameras
- Industry-leading cameras with extensive zoom, pan and tilt
