Patient family resources

404-785-KIDS (5437)
This number is the primary point of contact for patient families. This phone number, staffed by a team of experienced Children’s Healthcare of Atlanta representatives, is open 24 hours a day, seven days a week. Patient families can use 404-785-KIDS (5437) to:
• Access Children’s services.
• Schedule and change appointments.
• Reach a physician or department at Children’s.

MYchart
MYchart gives you, your patients and their legal guardians access to a portion of their Epic medical record. It also enables you and your patients to communicate through a secure online portal or mobile device. With MYchart, your patient families can be more informed, which can lead to improved satisfaction and outcomes. Patient families can:
• View immunization records.
• View lab and other test results and get notifications when most results are received.
• Request prescription refills.
• Communicate with you by sending and receiving secure messages.

Patient families should visit mychart.choa.org to activate a MYchart account.

Choa.org
Patient families can use the Children’s website to:
• Learn more about our medical services and physicians on our medical staff.
• Find information, including hours and directions to specific locations.
• Prepare for visits and overnight stays.
• Request copies of medical records.
• Contact our team with questions about billing and insurance.

Mobile app
Text the word KIDS to 770-766-3111 to receive a link to the free Children’s mobile app directly on your phone. You can also visit the App Store or Google Play to download the Children’s app for your smartphone or tablet.

With the Children’s app, patient families can:
• Find a hospital or neighborhood location.
• Locate a department, patient room or amenity within the hospital.
• Look up Children’s physicians who see patients at one of our facilities.
• Find our nearest Emergency Department and see wait times.
• Find our nearest Urgent Care Center, see wait times and save your spot in line.
• Access your patient information through MYchart.
Children’s offers urgent care, radiology, lab and emergency services at the following locations:

1. **Egleston hospital**
   1405 Clifton Road NE
   Atlanta, GA 30322
   Emergency Department, lab and radiology: CT, DEXA, fluoroscopy, interventional radiology, MRI, nuclear medicine, PET, sedation, ultrasound and X-ray

2. **Hughes Spalding hospital**
   35 Jesse Hill Jr. Drive SE
   Atlanta, GA 30303
   Emergency Department and radiology: fluoroscopy, ultrasound and X-ray

3. **Scottish Rite hospital**
   1001 Johnson Ferry Road NE
   Atlanta, GA 30342
   Emergency Department, lab and radiology: CT, DEXA, fluoroscopy, interventional radiology, MRI, nuclear medicine, sedation, ultrasound and X-ray

4. **Children’s at Chamblee-Brookhaven**
   In the Parkview on Peachtree shopping center
   5080 Peachtree Blvd., Suite 100
   Chamblee, GA 30341
   Urgent care

5. **Children’s at Cherokee**
   In the River Pointe shopping center
   1558 Riverstone Parkway, Suite 100
   Canton, GA 30014
   Urgent care

6. **Children’s at Forsyth**
   In The Collection at Forsyth
   410 Peachtree Parkway, Suite 300
   Cumming, GA 30041
   Urgent care, X-ray*

7. **Children’s at Hamilton Creek**
   In the Hamilton Mill Town Center shopping center
   2240 Hamilton Creek Parkway, Suite 600
   Dacula, GA 30019
   Urgent care

8. **Children’s at Hudson Bridge**
   In the Hudson Bridge Crossing shopping center
   1510 Hudson Bridge Road
   Stockbridge, GA 30281
   Urgent care, X-ray*

9. **Children’s at North Point**
   3795 Mansell Road
   Alpharetta, GA 30022
   Urgent care

10. **Children’s at Satellite Boulevard**
    2660 Satellite Blvd.
    Duluth, GA 30096
    Urgent care, lab and radiology*: X-ray and ultrasound

11. **Children’s at Town Center**
    625 Big Shanty Road NW
    Kennesaw, GA 30144
    Urgent care, lab and radiology*: CT, fluoroscopy, MRI, sedation, ultrasound and X-ray

12. **Children’s at Webb Bridge**
    3155 North Point Parkway
    Building A, Suite 150
    Alpharetta, GA 30005
    Lab and radiology*: CT, fluoroscopy, MRI, sedation, ultrasound and X-ray

404-785-KIDS (5437)

*Departamentos del Children’s at Scottish Rite hospital

Children’s Healthcare of Atlanta at Hughes Spalding es propiedad de Fulton-DeKalb Hospital Authority y es dirigido por HSOC Inc., institución asociada a Children’s.
Physician resources

As one of the largest pediatric healthcare systems in the country, Children’s offers a variety of ways for physicians to reach our staff and clinical services. Visit choa.org/md for more information about these services as well as access to our online forms.

accessCHOA

AccessCHOA is the web-based interface for the Children’s electronic health record system. It provides customized notifications about patient events, which can be forwarded to anyone in your practice. In addition, you can use it to:

• Place an order for outpatient diagnostics and rehabilitation.
• Place referrals to Children’s Physician Group specialists and specialty clinics.
• View notifications about key patient events, including admissions and discharges, emergency visits, and lab and imaging results.
• Check appointment status and patient scheduling information. AccessCHOA is the primary way your practice will receive patient information. To enhance patient confidentiality, Children’s will eventually eliminate faxing patient information to your practice.

Ask your physician liaison or visit accessCHOA.org to register and review educational resources. See the Tools section for a tip sheet about accessCHOA.

404-785-DOCS (3627)

Children’s recognizes that complex navigation is sometimes required to access healthcare services. By using this easy-to-remember phone number, physicians can connect to anyone or any service within our organization.

404-785-DOCS is staffed 24 hours a day, seven days a week by a team of experienced Children’s representatives who will promptly answer your call, evaluate your needs, provide the services requested or route you to the appropriate area.

Call 404-785-DOCS (3627) to:

• Access any Children’s service.
• Reach a patient, employee or department at Children’s.
• Collaborate on patient care.
• Schedule a patient appointment or ancillary test.
• Refer a patient to a Children’s Physician Group practice.
• Speak to a Children’s Physician Group provider during business hours through our physician-to-physician service.

Transfer Center

The Children’s Transfer Center can arrange for the acceptance and admission of your patient with one phone call, 24 hours a day, seven days a week. We can help:

• Coordinate ground or air transportation for your patient.
• Arrange for a bed with the appropriate level of care to be ready upon arrival.
• Initiate registration paperwork, including financial information and pre-certification.

Call 888-785-7778 or 404-785-7778 to reach our Transfer Center.

Scheduling elective admissions:

If you need to schedule an admission to Children’s and you do not have attending privileges, the Children’s Hospitalist Program can assist you with:

• Telephone consultations.
• Inpatient management services.
• Outpatient diagnostic referrals.
• Specialist referrals.

See the Tools section for our Emergency Department transfer guidelines.

Telemedicine

The Telemedicine Program at Children’s allows our pediatric specialists to provide care remotely to your patients through the use of technology when it is clinically safe and appropriate to do so.

Telemedicine, also referred to as telehealth or virtual visits, uses two-way interactive video over a secure, HIPAA-compliant network. Telemedicine visits with Children’s can take place in the comfort of a patient’s home or at another private location.

Refer your patient for an in-person visit with a Children’s pediatric specialist. Our team will determine whether a telemedicine visit is appropriate. Patient families may also call their provider to discuss if a telemedicine appointment is appropriate for their next visit.

Note: Measures and policies implemented during the COVID-19 pandemic have reduced some barriers to telemedicine access and reimbursement. Many of these policies are temporary and could change at any time.
**Physician Portal**

The Children's Physician Portal offers easy access to clinical reference tools and resources for members of the Children's medical staff, including:

- Clinical care guidelines to help you provide high-quality care.
- System leader contacts and structure to help you engage with your leaders.
- Professional development and continuing medical education (CME) tools and credit opportunities.
- A Children's medical staff directory.
- Curated medical news, strategies and other information.
- Wellness tools and resources to support your personal well-being.

Access the Physician Portal using your Children's network ID and password at [md.choa.org](http://md.choa.org). If you have forgotten your ID or password, or need one, contact the Children's Solution Center at 404-785-6767.

**Physician outreach**

A physician liaison is your primary contact for questions, concerns and issues. Physician liaisons help with:

- Barriers to access.
- In-services.
- Order forms or materials.

To learn more visit [choa.org/outreach](http://choa.org/outreach).

**Meet our liaisons**

**The Children’s Care Network (TCCN)**

The Children's Care Network (TCCN) is a clinically integrated partnership between Children's and community physicians designed to help facilitate better health outcomes for our patient population. The collaborative system also offers group purchasing power, cost savings and technical resources.

To find out more about our clinically integrated network, email [contact@tccn-choa.org](mailto:contact@tccn-choa.org), call 404-785-7935 or visit [tccn-choa.org](http://tccn-choa.org).
About us

Children’s Physician Group is one of the largest multispecialty pediatric physician practices in the Southeast, with nearly 500 physicians and more than 350 advanced practice providers who are employed by Children’s Healthcare of Atlanta and/or serve as members of the pediatric faculty at the Emory University School of Medicine.

With convenient locations at our three hospitals and multiple neighborhood locations in Atlanta and surrounding communities, our pediatric-trained doctors and surgeons represent more than 30 pediatric specialties.

Pediatric specialties

- Allergy and immunology
- Anesthesia
- Apnea
- Cardiothoracic surgery
- Child advocacy
- Critical care
- Cystic fibrosis (CF)
- Dentistry and orthodontics
- Emergency medicine
- Endocrinology
- Gastroenterology
- General surgery
- Gynecology
- Hematology/oncology
- Hepatology
- Hospitalists
- Infectious diseases
- Interventional radiology
- Neonatology
- Nephrology
- Neurology
- Neuropsychology
- Neurosurgery
- Nutrition
- Orthopaedics and sports medicine
- Otolaryngology
- Pathology
- Psychiatry
- Plastic surgery and craniofacial
- Pulmonology
- Radiology
- Rheumatology
- Sedation services
- Sleep
- Transplant

Multispecialty clinics

Children’s Physician Group providers also participate in several multispecialty clinics, including:

- 22q Deletion
- Aerodigestive
- Cerebral Palsy
- Cerebrovascular Disorders
- Chronic Kidney Disease
- Concussion
- Craniofacial Feeding
- Craniofacial Speech
- Developmental Neurology
- Developmental Progress
- Differences of Sexual Development
- Epilepsy/Ketogenic Diet
- Genetics
- Hypertension
- Infantile Spasms
- Leukodystrophy
- Medically Complex
- Muscular Dystrophy
- Neuro Metabolic
- Neuro Spine
- Neurofibromatosis
- Neurogastroenterology and Motility
- Neuromuscular
- New-Onset Seizure
- Pain Relief
- Pelvic and Anorectal
- Spasticity
- Spina Bifida
- Strong4Life
- Technology Dependent
- Tuberous Sclerosis
- Vagus Nerve Stimulation
- Vascular Anomalies

Visit choa.org/cpg for additional information about our specialties and clinics.
Physician-to-physician service
Physician-to-physician is a service offered through 404-785-DOCS (3627). The goal of this service is to provide you with improved access to Children’s Physician Group practices during business hours. A designated provider for participating Children’s Physician Group practices is available Monday through Friday from 8 a.m. to 5 p.m., excluding holidays, to respond to your non-urgent clinical inquiry. Physician-to-physician consultations should be requested when you need to speak with a subspecialist for advice about a patient. It should not be used for questions that do not require a subspecialist physician, such as lab results or appointment scheduling.

Enhancements
To improve your experience with our physician-to-physician service and better meet your needs, we have made the following enhancements:

- **Non-urgent, established patients**: Our turnaround time has been designated to 24 hours.
- **Urgent, established or non-established patients**: Our turnaround time has been designated to 60 minutes. In more than 60% of cases, you will be connected directly with a subspecialist.
- **Escalation**: If you do not receive a call back in the designated time frame, call 404-785-DOCS (3627) and your call will be escalated to practice leadership.

Four ways to refer a patient
At Children’s Physician Group, we want to make it easy for you to submit a referral to our pediatric specialty practices.

To refer a patient, use one of the following four methods:

- **accessCHOA**: AccessCHOA is a free, secure, web-based electronic health record system that provides physicians the ability to electronically submit referrals to Children’s Physician Group specialists. It also provides instant access to your patients’ information, customized notifications about patient events, and the ability to view the referral status and results.

- **choa.org/md**: Visit the Physician Resource page on the Children’s website for access to the Children’s Physician Group online referral form. Upload relevant clinical documents, patient demographics and imaging/diagnostic tests with the click of a button.

- **Fax**: See the Forms section for a hard copy of the Children’s Physician Group referral form. Completed forms may be faxed to 404-785-9111.

- **404-785-DOCS (3627)**: This single point of contact for physicians streamlines the referral process through an easy-to-remember phone number. 404-785-DOCS is staffed 24 hours a day, seven days a week. Call 404-785-DOCS and ask to speak with the clinical referral team to receive the status of your referral. Our clinical referral team is available Monday through Friday from 8 a.m. to 5 p.m. for any questions or concerns regarding your patient’s clinical referral.

See the Contact information section for a listing of Children’s Physician Group ambulatory specialties, physicians and locations.

CONCUSSION (CONTINUED)

**Neurosurgeon:**
Andrew Reisner, MD  
Medical Director, Concussion Program  
Medical Director, Neuro Trauma and Concussion  
*Interests:* brain tumors, concussions, Gamma knife radiosurgery, hydrocephalus, pituitary disorders and tumors

**Neuropsychologists:**
Laura Blackwell, PhD, ABPD  
*Interests:* acquired brain injury, chronic pain, concussion, pediatric neuropsychology, traumatic brain injury

Thomas Burns, PsyD, ABPP  
Director, Concussion Research  
*Interests:* acquired brain injury, cerebral palsy, concussion, epilepsy, neuroimaging

Elyssa Gerst, PhD  
*Interests:* cognitive development in children with complex medical histories, impact of congenital or acquired neurological disorders on neuropsychological functioning

Jacqueline Kiefel, PhD  
*Interests:* concussion, Duchenne muscular dystrophy, neurofibromatosis, spina bifida, traumatic brain injury

**Sports medicine physicians:**
Armand Scurfield, MD  
*Interests:* nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

J. Stephen Kroll, MD  
*Interests:* nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

**Physiatrists:**
Laura Jones, MD

Udayan Kulkarni, MD

Elizabeth Poplawski, DO

Joshua Vova, MD, FAAP, FAAPMR  
Medical Director, Rehabilitation

**Psychologist:**
Laura Wright, PhD  
*Interests:* pain assessment and treatment, chronic pain, promotion of resilience and adaptation among youth who experience pain

**Neurologists:**
Barbara Weissman, MD  
Medical Director, Neurology Quality  
Associate Professor, Emory University School of Medicine  
*Interests:* neurorehabilitation, cerebral palsy, traumatic brain injury, concussion, general pediatric neurology

Jasmine Forte, MD  
Assistant Professor, Emory University School of Medicine  
*Interests:* general pediatric neurology, migraines, concussion, idiopathic intracranial hypertension, sports neurology, tension-type headaches
**Physicians:**

- **Allan Dias, MD**
  Medical Director,
  Children’s Physician Group–Pulmonology
  at Scottish Rite

- **Lokesh Guglani, MD**
  Assistant Professor,
  Emory University School of Medicine

- **Matthew Hazen, MD**
  Director, Asthma Center
  Hughes Spalding hospital

- **Ajay Kasi, MD**
  Assistant Professor,
  Emory University School of Medicine

- **Kevin Kirchner, MD**
  Co-Director, Pediatric Cystic Fibrosis Program

- **LaTresa Lang, MD**

- **Rachel Linnemann, MD**
  Director, Cystic Fibrosis Center
  Co-Director, Pediatric Cystic Fibrosis Program
  Assistant Professor,
  Emory University School of Medicine

- **Julie Sedor, MD**

- **Haitham Shahrour, MD**

- **Arlene Stecenko, MD**
  Marcus Professor,
  Pulmonology
  Chief, Pulmonology, Allergy/Immunology,
  Cystic Fibrosis and Sleep
  Medical Director, Cystic Fibrosis Center
  Associate Professor,
  Emory University School of Medicine

Scientific Director, IBD  
Marcus Professor, Emory University School of Medicine  
*Interest:* IBD

**Chrissy Lopez, MD**  
Assistant Professor, Emory University School of Medicine  
*Interests:* liver and GI diseases, transplant hepatology
GASTROENTEROLOGY AND HEPATOLOGY (CONTINUED)

Barbara McElhanon, MD
Medical Director,
Feeding Program,
Marcus Autism Center
Associate Professor,
Emory University School of Medicine

Interests: GI issues, feeding, aerodigestive disorders, autism spectrum disorder

Joanna Niklinska-Schirtz, MD
Assistant Professor,
Emory University School of Medicine

Interests: IBD, nutrition, celiac disease

Sonal Patel, MD
Assistant Professor,
Emory University School of Medicine

Interests: IBD, enteral feeding, nutrition

Rene Romero, MD
Medical Director,
Transplant
Clinical Director,
Pediatric Hepatology
Professor, Emory University School of Medicine

Interests: liver diseases, short bowel syndrome, pre- and post-liver transplant care

Cary Sauer, MD, MSc
Medical Director,
Endoscopy Program
System Medical Director,
Gastroenterology, Hepatology and Nutrition
Associate Professor,
Emory University School of Medicine

Interests: IBD, GI issues

Bess Schoen, MD
Medical Director,
ImproveCareNow
Assistant Professor,
Emory University School of Medicine

Interests: IBD, GI issues

Dellys Soler-Rodriguez, MD
Program Director,
Transplant Hepatology
Assistant Professor,
Emory University School of Medicine

Interests: portal hypertension, metabolic liver disease, biliary atresia, post-transplant medical issues

Gayathri Tenjarla, MD
Assistant Professor,
Emory University School of Medicine

Interests: EoE, GI issues

Miriam Vos, MD, MSPH
Director, Nonalcoholic Fatty Liver Disease Program
Program Director,
Transplant Wellness
Associate Professor,
Emory University School of Medicine

Interests: liver diseases, pre- and post-liver transplant care

Field Willingham, MD, MPH, FASGE
Medical Director,
Therapeutic Endoscopy and ERCP
Associate Professor,
Emory University School of Medicine

Interests: interventional and advanced endoscopy

Psychologists:
Jessica Buzenski, PhD
Pediatric Psychologist, Gastroenterology

Gloria Chiang, PhD
Pediatric Psychologist, Hepatology

Bonney Reed, PhD
Pediatric Psychologist, Gastroenterology

Fecal microbiota transplant

Egleston-based surgeons:

**Amina Bhatia, MD, MS, FACS, FAAP**
Medical Director, Trauma Services, Egleston
**Interests:** Hirschsprung disease, minimally invasive surgery, neonatal surgery and prenatal consultations, patent ductus ligation, pectus repair, thoracic and trauma surgery

**A. Alfred Chahine, MD, FACS, FAAP**
Associate Professor, Emory University School of Medicine
**Interests:** congenital anomalies, noncardiac thoracic surgery and neonatal surgery, intestinal failure, anorectal malformations, Hirschsprung disease, surgical oncology

**Matthew Clifton, MD, FACS, FAAP**
Chief, General Surgery
Associate Professor, Emory University School of Medicine
**Interests:** hepatobiliary surgery, minimally invasive surgery, prenatal consultation and newborn surgery, surgical oncology

**Megan Durham, MD, FACS**
Practice Director, Children’s Physician Group–Pediatric Surgery
Medical Director, Pelvic and Anorectal Care
Surgical Director, Intestinal Rehab
Associate Professor, Emory University School of Medicine
**Interests:** colorectal surgery, surgical oncology, pectus excavatum, IBD, congenital anomalies, minimally invasive surgery, neonatal surgery, prenatal consultations

**Allison Linden, MD**
Medical Director, NICU and PICU
Assistant Professor, Emory University School of Medicine
**Interests:** neonatal surgery, minimally invasive surgery, surgical critical care, ECMO, global surgery

**Jonathan Meisel, MD, FACS, FAAP**
Assistant Professor, Emory University School of Medicine
**Interests:** appendicitis, hernias, pectus deformities, minimally invasive surgery, thoracic surgery, newborn surgery, prenatal consultations, trauma, adolescent surgery

**Paul Parker, MD, FACS, FAAP**
**Interests:** colorectal surgery, surgical oncology, pectus excavatum, IBD, congenital anomalies, minimally invasive surgery, neonatal surgery, prenatal consultations
Matthew Santore, MD, FACS, FAAP
Medical Director, Surgical Quality
Surgical Director
Assistant Professor, Emory University School of Medicine
Interests: ECMO, minimally invasive surgery and single-site laparoscopic surgery, neonatal surgery, prenatal consultations, endocrine surgery, thyroid surgery, surgical oncology, trauma surgery, thoracic surgery, IBD, cystic lung disease

Joseph Bussey, MD, FACS, FAAP
Interests: abdominal wall defects, anorectal malformations, pectus repair, Hirschsprung disease, GE reflux-fundoplication, minimally invasive surgery, neonatal and pediatric surgery, prenatal consultations

Julie Glasson, MD, FACS, FAAP
Interests: Hirschsprung disease, IBD, adnexal pathology, neonatal intestinal anomalies and abdominal wall defects, necrotizing enterocolitis, ovarian pathology, hepatic and pediatric tumors, trauma surgery, endocrine surgery, pancreatic surgery, patent ductus ligation

Rona Norelius, MD, FACS, FAAP
Interests: branchial clefts, chest wall deformities, chest masses, neonatal congenital deformities, inguinal hernias, undescended testicles, pediatric cancer

Scottish Rite-based surgeons:
Samiksha Bansal, MD
Interests: gastroesophageal reflux disease, minimally invasive surgery, thoracoscopic surgery

John Bleacher, MD, FACS, FAAP
Medical Director, Trauma Services, Scottish Rite
Interests: abdominal wall defects, anorectal malformations, pectus repair, Hirschsprung disease, GE reflux-fundoplication, minimally invasive surgery, neonatal and pediatric surgery, prenatal consultations

George Raschbaum, MD, FACS, FAAP
Interests: ECMO management, surgical education, minimally invasive surgery, pediatric trauma

Alexis Smith, MD
Interests: ECMO management, surgical education, minimally invasive surgery, pediatric trauma

Associate Professor, Emory University School of Medicine

Douglas Graham, MD, PhD
Chief, Aflac Cancer and Blood Disorders Center
Co-Director, Precision Medicine Program
Professor, Emory University School of Medicine

Frank Keller, MD
Associate Professor, Emory University School of Medicine

Glen Lew, MD
Associate Program Director, Fellowship
Associate Professor, Emory University School of Medicine

Tamara Miller, MD, MSCE
Assistant Professor, Emory University School of Medicine

Melinda Pauly, MD
Medical Director, Aflac Cancer and Blood Disorders Center at Scottish Rite Hospital
Assistant Professor, Emory University School of Medicine

Christopher Porter, MD
Director, Cancer Predisposition
Associate Professor, Emory University School of Medicine

Sunil Rakar, MD
Assistant Professor, Emory University School of Medicine

Himalee Sabnis, MD, MSc
Assistant Professor, Emory University School of Medicine

Daniel Wechsler, MD, PhD
Program Director, Oncology
Co-Director, Precision Medicine Program
Co-Director, Fellowship Program
Assistant Professor, Emory University School of Medicine

Neuro-oncology physicians:

Dolly Aguilera, MD
Assistant Professor, Emory University School of Medicine

Anna Janss, MD, PhD
Clinical Director, Neuro-Oncology
Associate Professor, Emory University School of Medicine

Tobey MacDonald, MD
Program Director, Neuro-Oncology
Professor, Emory University School of Medicine

Claire Mazewski, MD
Associate Professor, Emory University School of Medicine

Sickle cell disease physicians:

Nitya Bakshi, MD
Assistant Professor, Emory University School of Medicine

R. Clark Brown, MD, PhD
Director, Sickle Cell Disease Research
Associate Professor, Emory University School of Medicine

Carlton Dampier, MD
Professor, Emory University School of Medicine

Beatrice Gee, MD
Clinical Director, Sickle Cell Disease, System and Hughes Spalding Hospital
Professor, Emory University School of Medicine

Angelica James-Herry, MD
Assistant Professor, Emory University School of Medicine
Clinton Joiner, MD, PhD
Director, Hematology
Professor, Emory
University School of Medicine

Peter Lane, MD
Program Director,
Sickle Cell Disease
Professor, Emory
University School of Medicine

Wilbur Lam, MD, PhD
Chief Innovation Officer, Pediatric Technology Center
Associate Professor, Emory University School of Medicine

Tamara New, MD
Medical Director, Sickle Cell Disease at Egleston Hospital
Associate Professor, Emory University School of Medicine

Elna Saah, MD
Assistant Professor, Emory University School of Medicine

Vivien Sheehan, MD
Acting Associate Professor, Emory University School of Medicine

Amy Tang, MD
Medical Director, Sickle Cell Disease at Scottish Rite Hospital
Assistant Professor, Emory University School of Medicine

Marianne Yee, MD, MSc
Clinical Director,
Sickle Cell Disease
Assistant Professor, Emory University School of Medicine

Solid tumor physicians:

Thomas Cash, MD, MSc
Clinical Director, Solid Tumor Program
Assistant Professor, Emory University School of Medicine

Bradley George, MD
Assistant Professor, Emory University School of Medicine

Kelly Goldsmith, MD
Clinical Director,
Precision Medicine Program
Associate Professor, Emory University School of Medicine

Andrew Hong, MD
Assistant Professor, Emory University School of Medicine

Sarah Mitchell, MD
Assistant Professor, Emory University School of Medicine

Thomas Olson, MD
Program Director, Solid Tumor Program
Professor, Emory University School of Medicine

Kathryn Sutton, MD
Program Director,
Fellowship Program
Assistant Professor, Emory University School of Medicine

Karen Wasilewski-Masker, MD, MSc
Medical Director, Aflac Cancer and Blood Disorders Center
Associate Professor, Emory University School of Medicine

Transfusion medicine physician:

Cassandra Josephson, MD
Professor, Emory University School of Medicine

Palliative care:

Katharine Brock, MD, MS
Assistant Professor, Emory University School of Medicine
Physicians:

Evan Anderson, MD  
Associate Professor, Emory University School of Medicine

Frank Berkowitz, MBCh, MPH  
Professor, Emory University School of Medicine

Andres Camacho-Gonzales, MD  
Assistant Professor, Emory University School of Medicine

Ann Chahroudi, MD, PhD  
Associate Professor, Emory University School of Medicine

Lisa Cranmer, MD, MPH  
Assistant Professor, Emory University School of Medicine

Thomas Fox, MD  
Assistant Professor, Emory University School of Medicine

Kathryn Goggin, MD  
Associate Professor, Emory University School of Medicine

Interests: infections in immunocompromised children, transplant infectious diseases, long-term effects of sepsis and zoonotic infections

Cassie Grimsley Ackerley, MD  
Associate Professor, Emory University School of Medicine

Preeti Jaggi, MD  
Associate Professor, Emory University School of Medicine

Matthew Linam, MD, MS  
Medical Director, Outcomes and Analytics  
Associate Professor, Emory University School of Medicine

Christina Rostad, MD  
Assistant Professor, Emory University School of Medicine

Andrea Shane, MD, MPH, MSc  
Marcus Professor, Epidemiology  
Chief, Infectious Diseases  
Associate Professor, Emory University School of Medicine

* The vaccine clinic provides revaccination for children following a transplant or treatment that suppresses the immune system. It does not provide the COVID-19 vaccine for this population at this time (As of May 2021).

**Interests:**

- Ruba Al-Ramadhani, MD: General pediatric neurology, neonatal neurology
- Sonam Bhalla, MD: General pediatric neurology, neonatal EEG, neonatal seizures, childhood epilepsy syndromes, epilepsy surgery, treatment options for medically difficult-to-treat epilepsy
- Monideep Dutt, MD: General pediatric neurology, neonatal neurology
- Yaman Eksioglu, MD, PhD: Surgical epilepsy, intractable epilepsy syndromes, cortical malformations of cerebral cortex, tuberous sclerosis complex, genetic epilepsy syndromes, epileptic encephalopathies
- Jasmine Forte, MD: General pediatric neurology, migraines, concussion, idiopathic intracranial hypertension, sports neurology, tension-type headaches
- Jasmine Forte, MD: General pediatric neurology, migraines, concussion, idiopathic intracranial hypertension, sports neurology, tension-type headaches
- Jamika Hallman-Cooper, MD: Cerebral palsy, pediatric stroke, Botox, general pediatric neurology
- Philip Holt, MD: Childhood epilepsy, ketogenic diet therapy, intraoperative and intensive care, general pediatric neurology, autonomic disorders
- Grace Gombolay, MD: Neuroimmunology, multiple sclerosis, neuromyelitis optica, clinically isolated syndrome, transverse myelitis, acute disseminated encephalomyelitis (ADEM), anti-NMDA receptor encephalitis
Stephanie Keller, MD  
Associate Professor, Emory University School of Medicine  
**Interests:** neurogenetic and neurometabolic disorders, leukodystrophies, demyelinating diseases, general pediatric neurology

Emily Kern-Smith, MD  
Assistant Professor, Emory University School of Medicine

Ammar Kheder, MD  
Medical Director, Epilepsy Surgery and Stereo EEG  
Assistant Professor, Emory University School of Medicine  
**Interests:** epilepsy, epilepsy surgery, EEG, first seizure evaluation

Manisha Malik, MD  
Assistant Professor, Emory University School of Medicine  
**Interests:** hypersomnia, circadian rhythm disorders, insomnia

Elissa Ortolani, MD  
Assistant Professor, Emory University School of Medicine

Bryan Philbrook, MD  
Medical Director, Cerebrovascular Services  
Assistant Professor, Emory University School of Medicine  
**Interests:** stroke, neurocritical care, epilepsy, EEG, evoked potential studies

Saila Upadhyayula, MD, MPH  
Assistant Professor, Emory University School of Medicine  
**Interests:** pediatric neuromuscular disorders, EMG and nerve conduction studies, muscular dystrophy, general pediatric neurology

Sumit Verma, MD  
Medical Director, Neuromuscular  
Assistant Professor, Emory University School of Medicine  
**Interests:** pediatric neuromuscular disorders, EMG and EEG, myasthenia gravis, muscular dystrophy, general pediatric neurology

Barbara Weissman, MD  
Medical Director, Neurology Quality  
Associate Professor, Emory University School of Medicine  
**Interests:** neurorehabilitation, cerebral palsy, traumatic brain injury, concussion, general pediatric neurology

Emily Kern-Smith, MD  
Assistant Professor, Emory University School of Medicine

David Wolf, MD, PhD  
Assistant Professor, Emory University School of Medicine  
**Interests:** neuro-oncology, neurofibromatosis Type 1, neurocutaneous disorders, tuberous sclerosis, general pediatric neurology

Manisha Malik, MD  
Assistant Professor, Emory University School of Medicine  
**Interests:** hypersomnia, circadian rhythm disorders, insomnia

Elissa Ortolani, MD  
Assistant Professor, Emory University School of Medicine

Saila Upadhyayula, MD, MPH  
Assistant Professor, Emory University School of Medicine  
**Interests:** pediatric neuromuscular disorders, EMG and nerve conduction studies, muscular dystrophy, general pediatric neurology

NEUROPSYCHOLOGY

Children’s Physician Group  
404-785-DOCS (3627)  
404-785-9111

Center for Advanced Pediatrics (Mon-Fri)  
1400 Tullie Road NE, Fourth Floor  
Atlanta, GA 30329  
Drs. Alexander, Bearden, Gerst, Ilardi, Marcus, McManus Lee, O’Toole, Wright

Medical Office Building at Scottish Rite hospital (Mon-Fri)  
5461 Meridian Mark Road NE, Suite 180  
Atlanta, GA 30342  
Drs. Blackwell, Burns, Fournier-Goodnight, Fritz, Howarth, Kiefel, Ono, Quinoy, Schoffner

Physicians:

Nneka Morris Alexander, PhD, ABPP  
Pediatric Psychologist  
Interests: teacher perceptions of social functioning in children with surgically corrected congenital heart disease, self-talk interventions in sport and exercise

Donald Bearden, PhD  
Interests: association between pain and neuropsychological function in children, complex neurological disorders, epilepsy, sickle cell disease

Laura Blackwell, PhD, ABPP  
Interests: acquired brain injury, chronic pain, concussion, pediatric neuropsychology, traumatic brain injury

Thomas Burns, PsyD, ABPP  
Interests: acquired brain injury, cerebral palsy, concussion, epilepsy, neuroimaging

Ashley Fournier-Goodnight, PhD, NCSP, ABPP  
Interests: acute acquired/traumatic brain injury, early childhood assessment/intervention, posterior fossa syndrome, school re-entry

Courtney Fritz, PhD  
Interests: inpatient and day rehabilitation, mild to moderate/severe traumatic brain injury, disorders of consciousness, pediatric cancer and stroke, evidence-based cognitive rehabilitation interventions

Elyssa Gerst, PhD  
Interests: cognitive development in children with complex medical histories, impact of congenital or acquired neurological disorders on neuropsychological functioning

Robyn Howarth, PhD, ABPP  
Interests: anti-NMDA receptor encephalitis, disorders of consciousness, assessment of neurocognitive status and functional outcomes during inpatient rehabilitation, neurocognitive recovery following acquired brain injury, traumatic brain injury, brain tumors

Dawn Ilardi, PhD, ABPP  
Interests: atypical neurological development, cerebrovascular injury/disease, transition of care for special needs teens

Jacqueline Kiefel, PhD  
Interests: concussion, Duchenne muscular dystrophy, neurofibromatosis, spina bifida, traumatic brain injury

Susan McManus Lee, PhD, ABPP  
Interests: brain injuries, acute assessment and intervention following brain injury or illness, encephalitis, prematurity and perinatal complications

David Marcus, PhD, ABPP  
Interests: genetics, metabolic conditions, neurofibromatosis, epilepsy, spina bifida

Kim Ono, PhD, ABPP  
Interests: brain tumors, concussion, epilepsy, neuroimaging, traumatic brain injury

Kathleen O’Toole, PhD, ABPP  
Interests: acquired brain injury, cognitive remediation, epilepsy, comorbid disorders, remediation of school-based problems

Alexis Quinoy, PhD  
Pediatric Psychologist  
Interests: anxiety-related disorders, chronic illness and pain, cognitive behavioral therapy, rehabilitation

Kindell Schoffner, PsyD  
Pediatric Psychologist  
Interests: chronic illness and pain, coping skills, rehabilitation, acquired/traumatic brain injury, treatment of anxiety and depression

Laura Wright, PhD  
Pediatric Psychologist  
Interests: pain assessment and treatment, chronic pain, promotion of resilience and adaptation among youth who experience pain

Orthopaedists:

**Tim Schrader, MD**
Medical Director, Hip
Interests: complex hip problems, dysplasia, femoral-acetabular impingement, surgical dislocation of hip, hip sports injuries

**S. Clifton Willimon, MD**
Interests: arthroscopic surgery of the hip, complex knee ligament reconstruction, shoulder dislocation, sports injuries

**Saji Azerf, MD**
Interests: nonoperative musculoskeletal conditions, clubfoot, fracture care

**Robert Montero, MD**
Interests: Ponseti casting for clubfoot, gait abnormalities, intoeing, bow legs, knock knees, cerebral palsy

Sports medicine physicians:

**Ashley Brouillette, MD**
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

**J. Stephen Kroll, MD**
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

**Armand Scurfield, MD**
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

New physician:

**Stephen Miller, MD**
Sports medicine physician
Interests: musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

---

**Hand and Upper Extremity Program**

404-785-HAND (4263)

We work closely with community orthopaedic and hand surgeons to help make sure complete, coordinated care is delivered seamlessly at our hospitals for children with conditions of the hands, arms, wrists and shoulders. We also collaborate on research and quality initiatives.

**Hip Program**

404-255-1933

Our pediatric orthopaedic surgeons help make sure that complete, coordinated care is delivered seamlessly at our hospitals for children with hip conditions. We also collaborate on research and quality initiatives.

**Scoliosis Screening Program**

404-255-1933

404-785-7576

Scoliosis screenings are conducted at our Children’s Physician Group—Orthopaedics and Sports Medicine practice locations. Refer to pages 32 and 33 for a complete listing of all locations. By appointment only.

**Spine Program**

404-255-1933

Our orthopaedic surgeons help make sure that complete care is delivered seamlessly at our hospitals for children with spine conditions. Our dedicated spine liaison, reachable at the above number, coordinates the patient experience by helping make sure families have the information and resources they need before, during and after care. Additionally, the program’s spine second opinion document review service allows patients to have their medical records and imaging reviewed and assessed by our spine leadership team.

**Sports physical therapy**

Our services are available at several neighborhood locations throughout metro Atlanta. These locations are departments of Children’s at Scottish Rite hospital. Visit choa.org/sportsmed for addresses and directions.

- Alpharetta: 404-785-8570
- Atlanta (Meridian Mark): 404-785-5699
- Atlanta (North Druid Hills): 404-785-8421
- Canton: 404-785-4268
- Cumming: 404-785-3090
- Duluth: 404-785-8387
- Fayetteville: 404-785-8790
- Kennesaw: 404-785-8008
- Smyrna: 404-785-4271
- Snellville: 404-785-8081
- Stockbridge: 404-785-4163
Our services are available at several neighborhood locations throughout metro Atlanta. The appointment scheduler can assist families in finding the most convenient option.

### Cranial Remolding Program

**404-785-3229**

### Limb Deficiency Program

**404-785-5684**

**Services offered:**

- Adaptive sports
- Intelligible hand
- Limb lengthening surgery
- Prosthetics design
- Rehabilitation
- Silicone restoration

### OTOLARYNGOLOGY

#### Children's Physician Group

**404-785-DOCS (3627)**

**404-785-9111**

**Center for Advanced Pediatrics (Mon-Fri)**

1400 Tullie Road NE, First Floor
Atlanta, GA 30329

*Drs. Alfonso, Brown, Evans, Goudy, Govil, Landry, Prickett, Raol*

**Children’s at Fayette (Tue, Thu)**

In Piedmont Fayette Hospital
1265 Highway 54 West, Suite 200
Fayetteville, GA 30214

*Drs. Evans, Govil*

**Physicians:**

- **Kristan Alfonso, MD**
  Assistant Professor, Emory University School of Medicine
  *Interests:* sensorineural and conductive hearing loss, cochlear implants, chronic ear disease, external ear abnormalities, nasal and sinus disease, salivary gland disease, airway disorders, head and neck masses

- **Clarice Brown, MD**
  Assistant Professor, Emory University School of Medicine
  *Interests:* general pediatric otolaryngology, head and neck masses, sinonasal disease, obstructive sleep apnea, dysphagia

- **Sean Evans, MD**
  Assistant Professor, Emory University School of Medicine
  *Interests:* general pediatric otolaryngology, head and neck masses, congenital deformities, diseases of the sinuses and nose, airway abnormalities, speech difficulties, ear infections and disease

- **Steven Goudy, MD**
  Medical Director, Otolaryngology
  Associate Professor, Emory University School of Medicine
  *Interests:* maxillary development, Pierre Robin sequence, vascular malformations, velopharyngeal insufficiency

- **Nandini Govil, MD**
  Assistant Professor, Emory University School of Medicine
  *Interests:* cochlear implants, congenital and acquired hearing loss, sinusitis

- **April Landry, MD**
  Assistant Professor, Emory University School of Medicine
  *Interests:* airway disorders

- **Kara Prickett, MD**
  Assistant Professor, Emory University School of Medicine
  *Interests:* airway reconstruction, head and neck masses, hearing loss, cochlear implants, thyroid disease

- **Nikhila Raol, MD, MPH**
  Assistant Professor, Emory University School of Medicine
  *Interests:* voice disorders, sleep disorders

### Hearing loss and cochlear implant

**404-785-7174**

**404-785-7113**

Our services are available at several neighborhood locations throughout metro Atlanta. The appointment scheduler can assist families in finding the most convenient option. These locations are departments of Children's at Scottish Rite hospital.

Forms and tools
Forms

accessCHOA

Reminder: The fastest way to submit your order or referral is electronically, using accessCHOA.

AccessCHOA is the web-based interface for the Children’s electronic health record system. It can be used to place an order for outpatient diagnostics and rehabilitation as well as for referrals to Children’s Physician Group specialists*. To learn more, see Page 4 of this guide or go to the Tools section for a tip sheet on using accessCHOA.

If you are not connected to accessCHOA, some online referral forms and order forms can be submitted electronically at choa.org/md.

Our forms

Children’s Physician Group:

• Provider referral form
• Orthopaedics and sports medicine patient referral form
• Rheumatology guidelines and referral form
• Synagis enrollment form

Cardiac:

• Pulmonary Hypertension Clinic referral form
• Sibley Heart Center Cardiology referral form

Child advocacy: Stephanie V. Blank Center for Safe and Healthy Children request for services form

Concussion: Downtime mild traumatic brain injury and concussion assessment criteria tool

Lab: Outpatient requisition form

Neurophysiology: EEG order form

Radiology

• Advanced pediatric imaging form
• Interventional radiology form
• Pediatric imaging form

Rehabilitation: Rehabilitation services order form

Sleep: Sleep disorders lab order form

Sports medicine: Order form

*This does not include the Stephanie V. Blank Center for Safe and Healthy Children or Sibley Heart Center Cardiology forms. These forms must be faxed.
Complete this form and fax it to 404-785-9111. Use one form for each patient.

If the patient needs to be seen within the next week, call 404-785-DOCS (3627) and do not fill out this form.

□ Macon: 4660 Riverside Park Boulevard, Macon, GA 31210
□ Villa Rica: 705 Dallas Highway, Suite 301, Villa Rica, GA 30180
Below is a list of guidelines to follow when referring a patient to Children’s Physician Group–Rheumatology for a consultation. These are meant to be general guidelines. If you have specific questions, call 404-785-DOCS (3627) and ask to speak with the on-call rheumatologist.

**Conditions treated**

- Ankylosing spondylitis
- Behçet’s disease
- Chronic recurrent multifocal osteomyelitis (CRMO)
- Granulomatosis with polyangiitis (Wegener’s)
- Juvenile dermatomyositis
- Juvenile idiopathic arthritis (JIA)
- Microscopic polyangiitis
- Mixed connective tissue disease
- Morphea/localized scleroderma (in conjunction with dermatology)
- Periodic fever syndromes
- Psoriatic arthritis
- Polyarteritis nodosa
- Sarcoidosis
- Sjögren’s syndrome
- Systemic lupus erythematosus
- Systemic sclerosis/scleroderma
- Uveitis (along with ophthalmology)

**Urgent referrals**

If you feel your patient needs to be seen immediately, denote “urgent” on the rheumatology referral form. All referrals marked “urgent” are triaged to help make sure patients are seen in a timely fashion. If you wish to speak to the on-call pediatric rheumatologist, call 404-785-DOCS (3627). Generally, conditions that may warrant an urgent initial outpatient visit include, but are not limited to:

- Persistent joint swelling (chronic arthritis is defined as ≥6 weeks) without antecedent trauma. Starting an NSAID such as ibuprofen or naproxen may be warranted. We do not advocate giving these patients oral steroids prior to the initial consultation visit, as they may obscure alternative diagnoses and signs of arthritis.
- Significant joint contractures affecting function.
- Joint pain and swelling with persistent fevers (>101° F) without infectious or oncologic etiology.
- A persistent malar rash with mild cytopenias, signs of serositis (pleural effusion on X-ray or pericardial effusion on echocardiogram) or mild proteinuria (send first morning urine protein: creatinine).
- A dermatomyositis rash (i.e., persistent pink scaly papular rash over MCPs, PIPs, elbows and/or knees, or malar rash) with signs of weakness or elevated muscle enzymes (i.e., AST, ALT, CK or LDH).

**Non-urgent referrals**

There are several conditions we see that may not warrant an urgent evaluation given the available resources. These may include the following:

- Chronic pain with sleep disturbances, fatigue, diffuse joint or muscle pain with normal exam, and normal CBC and acute phase reactants do not require an urgent appointment. These patients can be managed by the primary care provider with counseling or by the pain service if severe. A positive ANA test without other symptoms, exam findings or abnormal labs (i.e., CBC, ESR, CRP, CMP, urinalysis, muscle enzymes, TSH or free T4) does not change this recommendation.
• Children with musculoskeletal pain but no signs of inflammation (i.e., swelling, warmth or decreased range of motion) seldom have a chronic rheumatic condition, even if they have a positive ANA test. Consider X-ray to evaluate for fracture, cancer and consider trial of NSAIDs, physical therapy and increased physical activity. Children with prolonged episodes of intermittent leg pain at night with normal daytime activities and normal studies (i.e., CBC, ESR, CRP or X-ray) usually have “growing pains” and do not necessarily need a rheumatologic evaluation.

• Raynaud’s phenomenon is a common complaint in tall, thin teenage girls in winter months. Most of these patients—as long as they do not have other concerning symptoms or exam abnormalities—have primary Raynaud’s phenomenon and no underlying rheumatic disease. Labs that are helpful in evaluating these patients and could be obtained prior to referral include: CBC with differential, ESR, CRP, CMP, ANA IFA and anti-phospholipid antibodies. Make sure patients keep core and extremities warm by wearing warm gloves and socks, and by using heat packs.

• Abnormal lab findings, such as a positive ANA or positive rheumatic factor at a low titer, in the absence of objective clinical findings usually do not require rheumatologic evaluation.

Conditions seen by other specialists
There are some conditions that may warrant the expertise of other specialties, even though joint pain might be one of their manifestations.

• Fibromyalgia/amplified musculoskeletal pain syndrome: For patients with chronic widespread pain where you suspect fibromyalgia, make a referral to the Pain Relief Clinic as well. The wait is often long for these patients. If they wait to see rheumatology before a referral to the Pain Relief Clinic is made, they will wait even longer to be seen in the Pain Relief Clinic. Our primary role is to exclude a rheumatic disease that might be present concomitantly.

• Non-inflammatory connective tissue disorders (i.e., Ehlers Danlos syndrome or Marfan’s syndrome): Refer to the Genetics Clinic. Also consider a cardiology evaluation to screen for cardiac manifestations of connective tissue disease.

Referrals and medical records
All referrals marked “urgent” are triaged to help make sure patients are seen in a timely fashion. The on-call rheumatologist is available to discuss any case or concern by calling 404-785-DOCS (3627). A rheumatology referral form is available to aid in communication of clinical data.

• Non-urgent referral requests should be faxed to 404-785-9111.
• Urgent referral requests should be faxed to 404-785-9096.

Make sure all appropriate records are faxed to our office prior to the patient’s visit. This includes the office visit notes, imaging studies (i.e., X-rays or MRI) and lab results. If lab results are pending at time the records are faxed, send the complete results when available.

If the patient had imaging studies, ask the family to bring a CD with the images to their rheumatology appointment.

If the patient has already seen other specialists related to their symptoms (i.e., ophthalmology or orthopaedics), send these records to us as well.
Children’s Physician Group—
Rheumatology

Referral form

☐ Non-urgent referrals: Fax this form to 404-785-9111.
☐ Urgent referrals: Fax this form to 404-785-9096. Call 404-785-DOCS (3627) if you would like to discuss this case with the on-call rheumatologist.

__________________________
Today’s date

Checklist:
☐ Fax all appropriate records to our office prior to the patient’s visit. This includes office visit notes, imaging studies (X-rays, MRI, etc.) and lab results. If lab results are pending at the time records are faxed, make sure the completed results are sent over when available.
☐ If the patient had imaging studies, ask the family to bring a disc with the images to their rheumatology appointment.
☐ If the patient has seen other specialists related to their symptoms, send these records to us as well.

___ Event Recorder (30 day study)

Referring Provider Signature Required: ______________________________ Date: ___/___/___

At Sibley Heart Center Cardiology we have a medical interpreter and language line available to assist all non-English speaking patients.

Please call us at 404-256-2593 or visit www.choa.org/cardiologyreferrals to submit an online referral.

To request more pads to be sent to your office, visit choa.org/orderpad
Request for Services

Primary Care Provider (PCP) Referral
Stephanie V. Blank Center for Safe and Healthy Children
Child advocacy center and a department of Children’s at Scottish Rite hospital

PLEASE FILL OUT COMPLETELY
Date of request: _________________

Please note: PCPs are only able to request forensic medical exams.

Practice and Physician/Provider Name: ______________________________________________
Are you requesting a forensic medical exam? Yes ___ No _____
Is law enforcement involved? Yes ___ No _____
Jurisdiction: ________________________ Case Number: ________________________
Is DFCS involved? Yes ___ No _____ County: ____________

If there is a suspicion for child abuse, a report to DFCS is required by law.
Report by dialing: 1-855-GA-CHILD or 1-855-422-4453
(Reporting to the SVB Center does not satisfy mandated reporting requirements)

Victim’s Data
Victim’s Legal Name: _______________________________ Date of Birth: __________ Age: ___
Gender: _____Male _____Female Race: _____________ Language: ________________
Victim’s Address: __________________________________ City / ZIP: ________________
County: ____________
Parent/Legal Guardian Name: ____________________________________________
Parent/Legal Guardian Date of Birth: ____________
Relation to Victim: __________________
Phone: (H) _____________ (C) ________________
Any known special needs/developmental delays?
______________________________________________________________________________
______________________________________________________________________________

Allegations
Sexual abuse _____ Physical abuse _____ Neglect ______

FOR SEXUAL ABUSE (Please indicate ALL that apply):
Fondling _____ Digital-vaginal _____ Digital-Anal _____
Oral-Vaginal _____ Oral-Penile _____ Penile-Vaginal _____ Penile-Anal _____
DESCRIPTION OF ALLEGED ABUSE:
For all concerns, please be specific regarding what is being reported. This will greatly assist our ability to serve clients adequately and promptly.

Call Intake Coordinator at 404-785-3833 if you need confirmation that the faxed or emailed referral has been received.
DOWNTIME MILD TRAUMATIC BRAIN INJURY/CONCUSSION ASSESSMENT CRITERIA TOOL

4. TraumaticBrainInjury.com, LLC, Symptoms of Traumatic Brain Injury "Glasow Coma Scale."

### PATIENT IDENTIFICATION

<table>
<thead>
<tr>
<th>Name</th>
<th>Date of Birth</th>
<th>MRN#</th>
<th>Account/HAR#</th>
</tr>
</thead>
</table>

### Date of Exam:  
- [ ] Initial  
- [ ] Second  
- [ ] Third  
- [ ] Fourth  
- [ ] Additional

#### Injury Assessment

1. Complete Neuro Exam including Glasgow Coma Score:

2. **Abnormal Physical findings?**
   - [ ] Direct  
   - [ ] Indirect  
   - [ ] Unknown
   - [ ] Yes  
   - [ ] No

   a. Is there evidence of a forcible blow to the head (direct or indirect)?
   b. Is there evidence of intracranial injury or skull fracture?
   c. Location of impact:
      - [ ] Frontal  
      - [ ] Left Temporal  
      - [ ] Right Temporal  
      - [ ] Left Parietal  
      - [ ] Right Parietal  
      - [ ] Occipital  
      - [ ] Neck

3. **Cause:**
   - [ ] MVC  
   - [ ] Pedestrian-MVC  
   - [ ] Fall  
   - [ ] Assault  
   - [ ] Sports (specify)  
   - [ ] Other

4. Was the injury witnessed or un-witnessed?  
   - [ ] Witnessed  
   - [ ] Un-witnessed

5. **Amnesia:**
   - BEFORE (Retrograde) Are there any events just BEFORE the injury that you/your child have no memory of (even brief)?
   - AFTER (Anterograde) Are there any events just AFTER the injury that you/your child have no memory of (even brief)?

6. **Loss of Consciousness:**  
   - [ ] Yes, how long?  
   - [ ] No

7. **EARLY SIGNS:**  
   - [ ] Appears dazed or stunned  
   - [ ] Is confused about events  
   - [ ] Answers questions slowly  
   - [ ] Repeats questions  
   - [ ] Forgetful (recent info)

8. **Seizures:**  
   - [ ] Yes  
   - [ ] No

Children’s Healthcare of Atlanta
Sleep Disorders Laboratory Order Form

Please print clearly

Child’s name: _____________________________________     Sex: □ M □ F     Child’s DOB: ________________

Children’s MRN (if known): ________________    Parent/Guardian’s Name: _____________________________

Address: ____________________________________________________________________________________________

Primary phone: __________________         Alt. Phone: ___________________     Email: __________________________

Preferred language:   English__     Spanish ___     Other: ________________________________

Ordering physician: ________________________________________    Office Phone: ___________________     Fax: __________________________

Primary care physician (if not the ordering physician): ____________________________________________________

Source:   □ Office □ TDPC □ Craniofacial □ MDA □ Sickle cell □ Other: ________________________________

Previous study: □ No □ Yes If Yes: □ Children’s Healthcare of Atlanta □ Other: ______________

Reason for study: __________________________________________________________________________________

List signs/symptoms, do not use “rule out,” “probable,” “suspected,” etc.

ICD-10 Code (sleep related; required)    Check all that apply:

□ R06.83 (snoring)    □ G47.33 (obstructive sleep apnea)
□ G47.36 (hypoxemia)    □ other(s) _________________________

Other medical problems: □ Down Syndrome □ ADHD □ Autism □ Sickle cell □ Tracheostomy □ Obesity

Insurance company: ________________________________________    Group/ID #: ____________________________

Pre-certification/authorization number: __________________________________________________________________________

If pre-certification is required by insurance, please obtain and fax the authorization to us no later than one week before the test date.

Evaluation Requested: (for explanation, visit choa.org/sleep or call us)

□ Nocturnal Polysomnogram (CPT code 95810 if > 6 yrs or 95782 if < 6 yrs of age)
   This is a complete overnight study that includes sleep staging and respiratory parameters
   □ Check here if you would like us to order O2 (if needed) and provide consultation/follow up
   □ Cardiology patients: Provide the child’s baseline/expected SpO2 ______________

□ CPAP or Bi-level PAP titration (CPT code 95811 if > 6 yrs or 95783 if < 6 yrs of age)
   CPAP/BPAP titration order form required; a sleep medicine or pulmonology consult is recommended

□ Multiple Sleep Latency Test (MSLT) (CPT code 95805)
   Nap study for narcolepsy; must also order the Nocturnal Polysomnogram above
   A sleep medicine consult is required before an MSLT unless previously evaluated by a neurologist

Special study requests and/or special needs of the child: ______________________________________________________
____________________________________________________________________________________________________

We will schedule the study at the Children’s Sleep Laboratory that is best for the family and the parameters requested:
   Egleston Sleep Center   Satellite Boulevard Sleep Center   Scottish Rite Sleep Center

Interpreting group for this study (each of our sleep specialists can interpret studies performed at any location):
   □ Children’s Physician Group–Sleep (Egleston-based physicians: Roberta Leu, Daniel Torrez)
   □ Children’s Physician Group–Sleep (Scottish Rite-based physicians: Gary Montgomery, Sophia Kim)

The ordering physician must choose the interpreting group and send clinical notes before we can schedule the study.

Ordering physician signature: _____________________________________     Date: __________________________

Please print name clearly: ____________________________________________

Fax this form and history/clinical notes to 404-785-2211
Questions: Contact Central Scheduling at 404-785-2974 or sleepcenterschedulingoffice@choa.org

Revised 08/2018   CPT Codes as of 2015   Visit choa.org/sleep for more information or to print additional forms.

Judson L. Hawk Jr., MD, Clinic for Children

About our multidisciplinary clinics

The Judson L. Hawk Jr., MD, Clinic for Children—located on the sixth floor of the Center for Advanced Pediatrics—offers multispecialty outpatient treatment for children with a wide range of medical and social complexities. By housing several outpatient services together, families have a place where they can receive coordinated care. This model builds upon the clinic concept that Judson L. Hawk Jr., MD, helped initiate more than 30 years ago.

Our clinics:

22Q Deletion
22Q deletion, DiGeorge, Velocardo facial Syndrome

Cerebral Palsy/Spasticity
Motor skills, muscle weakness

Differences in Sexual Development
Ambiguous genitalia

Neurogastroenterology and Motility
Abdominal pain, incontinence, constipation, difficulty swallowing

Genetics
Developmental delay, pigmentary disorders, Café au lait spots, neurofibromatosis, autism spectrum disorders

Medically Complex Care
Cerebral palsy, hypoxic ischemic encephalopathy mitochondrial diseases

Muscular Dystrophy
Spinal muscular atrophy, Duchenne, Becker, myotonic diagnosis

Neurofibromatosis/Tuberous Sclerosis
Skin abnormalities, neurological symptoms

Neuro Spine
Back and neck pain, herniated discs, spinal degeneration

Pain
Musculoskeletal, inflammation, abdominal pain

Pelvic and Anorectal Care
Hirschsprung’s disease, anorectal malformations, idiopathic constipation, pelvic and spinal tumors

Spina Bifida
Hydrocephalus, bowel problems, mobility weakness

Strong4Life
BMIs outside of height and weight range coupled with weight-related illness

Vascular Anomalies
Hemangiomas, capillary malformations, vascular malformations, venous malformations, lymphatic malformations, arteriovenous malformations

Revised: April 21, 2021
Getting started

What is accessCHOA?
AccessCHOA is a tool that provides real-time web access to patient information, comprised of different web pages or activities that correspond to different tasks. The activity that you use depends on what you want to accomplish. For example, if you want to see detailed information about a patient’s lab results, you can use the Results Review activity.

This tip sheet includes information to help you get started, including browser requirements, and how to log in and log out. Each section contains information on how to accomplish the task, along with a picture of the activity for quick reference. Note that these images may differ slightly from what you see when you are using accessCHOA.

Browser, system and connection requirements
We strongly recommend a high-speed internet connection for optimal performance. Your browser must be Java enabled, and you must use one of the following internet browsers to use accessCHOA:
• Microsoft Internet Explorer 8.0 or 11.0 (for Microsoft Windows platforms)
• Mozilla Firefox 3.0 (for Microsoft Windows platforms and Mac OS X platforms)

You also need a minimum screen resolution of 1024x768 pixels, and Adobe Reader must be installed to view documents.

Why use accessCHOA?
This web application is designed to extend continuity of patient care by providing community physicians secure access to select patient information in the patient’s medical record. Typical users are physicians, physician assistants, nurse practitioners, nurses and office staff who require access to patient clinical, demographic and insurance information at Children’s.

Users must complete several steps to gain secure access to accessCHOA.
1. Identify individuals in your practice who will require access to accessCHOA. Note that you must identify any physician or provider for whom you would like to see patient information.
2. Include all users who will need access to accessCHOA on the New Practice Request Form at accesschoa.org. Be sure to complete all required information.
   • Complete the contact information section at the top of the form.
   • Enter the first name, middle initial, last name, job title and/or practice role of each office staff member.
   • The last four digits of the Social Security number is a Children’s standard for creating Epic login IDs for each nonemployed individual who will access confidential patient information.
   • An email address must be provided for each provider or other professional who will use accessCHOA. The email address is used to return the users’ login information, and can also be used to notify users of certain patient events, such as a new lab result or admission.
3. Once all information is complete, submit the New Practice Request Form using the “Submit” button at the bottom of the form. Once the practice and users are approved, an email with the user’s login information is generated and sent to each user.

4. Go to accesschoa.org to sign in to the web application.

Note: First-time users are asked to accept the Terms and Conditions. Click “Accept.”

**How do I log in?**

1. Enter the following URL: accesschoa.org
2. Enter the “User ID” that you received in your welcome to accessCHOA email in the User ID field.
3. Press “Tab” to move to the password field. Enter the password that you received in your welcome to accessCHOA email.
4. After you have entered your user ID and password correctly, press “Enter,” or click the “Log In” button.
5. You will be prompted to change your password, which is required.
6. When the Terms and Conditions page appears, read the agreement and click “Accept” to acknowledge your agreement with the terms. You are now logged in to accessCHOA.

Note: Terms and conditions will appear when they are updated and on an annual basis.

7. You may be prompted to identify a department when logging in to accessCHOA.
   
   If you see this screen, click on the magnifying glass, and choose the accessCHOA department.

If this is the most common way you log in to the system and would like to have accessCHOA as your default department, contact us at 404-785-6767 and we can make that change for you.

Note: If you see patients at our facilities and log in to “hyperspace,” any changes to your default department in accessCHOA will change your department there as well.
How do I log out?
To maintain patient confidentiality, you need to log out, or use a secure screen when finished or leaving the computer for any reason. There are two ways to do this:

1. Click to log out of accessCHOA. The next time you log in, you are directed to your start page.

2. Secure the computer by clicking . When you log back in, you are returned to the same page you were using before securing the screen. There is no need to navigate back to the page you were previously working on.

Show time-out warning
After 20 minutes of inactivity, your accessCHOA session will time out. If your session is about to time out, a warning message appears in the application banner. Until you perform an action, such as clicking on a page or typing, the session times out.

What if I forget my password?
See your site administrator or call the solution center at 404-785-6767.

Help and contact information
For help using an activity, click on the web page.

Additional tip sheets can be found within the accessCHOA application on the training page.

Contact the Children’s Solution Center at 404-785-6767 if you have any questions or concerns.
Referring patients to a Children’s Emergency Department

Children’s Healthcare of Atlanta believes effective communication between community pediatricians, urgent care physicians and our Emergency Department physicians is an important part of our shared goal to provide high-quality care to our patients. Before you transfer a patient, review the following information. This will help you and patient families better connect with our services. **Do not send patients to the Emergency Department if they do not have a true emergent need.**

If you feel as though your patient warrants a direct admission, call the Transfer Center and discuss the case with the hospitalist on call. The patient may be able to bypass a trip to the Emergency Department depending on the complaint, the acuity, the workup that has already been completed and the comfort level of the admitting team.

**Step 1: Call the Transfer Center at 404-785-7778 or 888-785-7778.**

*We need to know:*
- The patient’s name, date of birth and sex.
- The patient’s complaint and any other relevant medical, personal or other history.
- The patient’s lab results. Send copies of all labs or verbally detail the lab values.
- Relevant workup that has been completed for the patient. The Emergency Department physician will review this information to avoid any duplication.
- Whether the patient needs air or ground transportation.
- Your cell phone or after-hours contact information for the Emergency Department physician to use if they have questions regarding the patient; direct cell phone numbers are preferred rather than practice numbers, because patient arrival and workup times may take place after hours.
- Whether you would like updates on your patient.

**Step 2: Decide if you need to speak to an Emergency Department physician regarding an emergent patient.**

*We need to know:*
- Your preferences or concerns regarding the patient.
- Your patient’s specific symptoms and the disease process(es) you are concerned about.

Direct communication can help us better understand your specific concerns and your desired outcome for the visit. This may help to increase efficiency, enhance the patient experience and reduce unreasonable expectations.

**Step 3: Advise the parents/guardians on next steps.**
- To help set proper patient family expectations, advise families that they may not see a specialist in the Emergency Department. The Emergency Department physicians will determine if the patient’s condition requires an immediate evaluation by a specialist. This is often not required. Emergency Department physicians will also determine if the patient needs diagnostic testing, admission, etc.
- Tell them to keep the child NPO if you anticipate there may be a need for sedation or anesthesia.
- They can download the Children’s mobile app to get step-by-step directions to a Children’s Emergency Department. This free app can be downloaded on a mobile device by searching for Children’s Healthcare of Atlanta on Google Play or the App Store. Visit [choa.org/app](http://choa.org/app) to learn more.
- Have them call **404-785-KIDS (5437)** if they have questions or need to reach their child’s room after they have been admitted.

**Following up on patients**
- Check accessCHOA for updates on your patient or visit the physician portal to review clinical guidelines.
- If you need an update on a patient while he is in the Emergency Department, call the Transfer Center at **404-785-7778** or **888-785-7778**. Representatives will attempt to connect you with the patient’s Emergency Department care provider.
Leadership team contacts
We’re here to help. Contact us if you need to connect with our leadership team regarding the Emergency Department.

Primary contacts
Reena Blanco, MD, Medical Director, Emergency Medicine at Egleston hospital
reena.blanco@choa.org
Mark Griffiths, MD, Medical Director, Emergency Medicine at Hughes Spalding hospital
mark.griffiths@choa.org
Jim Beiter, MD, Medical Director, Emergency Medicine at Scottish Rite hospital
james.beiter@choa.org
Srikant Iyer, MD, Chief, Emergency Services
srikant.iyer@choa.org

For unresolved issues, contact our campus medical directors:
• Scottish Rite: Michael Mallory, MD
  michael.mallory@choa.org
• Egleston: Stephanie Jernigan, MD
  stephanie.jernigan@choa.org
• Hughes Spalding: Lynn Gardner, MD
  lynn.gardner@choa.org

Frequently asked questions
At Children’s, we are committed to helping physicians experience a smooth transition from patient care in our system through discharge to the patient’s primary medical home.

Q: Does the Children’s Transfer Center transfer patients to all Children’s hospital campuses?
A: Yes, the Children’s Transfer Center transfers patients to all Children’s hospital campuses, including the Emergency Departments at Egleston, Hughes Spalding and Scottish Rite.

Q: Who do I call if I am not certain the patient needs to be transferred and wish to consult with an on-call pediatric specialist?
A: If you feel your patient may need to be transferred and wish to consult with an on-call specialist, contact the Transfer Center anytime at 404-785-7778. A registered nurse will assist you in coordinating this consult.

Q: What is the difference between the Transfer Center and 404-785-DOCS (3627)?
A: The Transfer Center, 404-785-7778, assists physicians and outside facilities with transfers into our system. The Transfer Center helps with emergent patients and transport needs and consults on patients who need immediate or real-time interventions and guidance.

Our main physician line, 404-785-DOCS, is not for Emergency Department patients. This contact number helps you connect to Children’s services for non-urgent reasons during business hours without having to remember multiple numbers.

Q: Will I be contacted once my patient is discharged?
A: Yes. You will receive notification of patient discharge through fax. We are aware that this process needs improvement and will continue to look for ways to improve communication, specifically related to notifications of patient death. We welcome your feedback on how we can address your important concerns.

Q: How can I help make sure that I get an update about my patient?
A: Notify the Transfer Center that you would like an update from the emergency physician and be sure to leave your direct cell phone or after-hours phone number where you can be reached. On average, it takes patients two to three hours to arrive at the Emergency Department following your referral. Evaluation and test results may take an additional two hours.

Q: What if my patient wants to go to the Emergency Department because they need a diagnostic test or want to get in sooner to see a specialist?
A: We realize that many patient families do not wish to wait for their appointment with a specialist or want to complete a diagnostic test after hours. These nonemergent visits to the Emergency Department affect our efforts to provide care and efficient service. We are working to centralize referrals and reduce Children’s Physician Group wait times. We are growing our offerings in many key specialty areas and are providing single points of contact for patients and physicians to improve patient access. We continue to rely on your support to help patient families appropriately utilize the Emergency Department.

Visit the Children’s Physician Portal at md.choa.org for clinical guidelines and resources.
Pediatric endocrinology and obesity

A physician’s quick guide to helping children with obesity

At Children’s Physician Group—Endocrinology and Strong4Life, our goals are to diagnose pathological causes of obesity and manage endocrine complications of obesity. This document provides a synopsis of endocrine problems that commonly arise in general pediatric management of obesity.

**Etiology of obesity**

Short stature or slow growth velocity in a growing obese child is a red flag for a pathological cause. Obesity onset before age 5 is typical in children with a monogenic cause of obesity. However, only 5 percent of children with early onset obesity have a known genetic case.

**Common conditions**

**Cushing syndrome**

This can be difficult to diagnose. Look for features beyond obesity and striae, including short stature, hypertension, proximal limb muscle wasting or weakness, and diabetes. The overnight dexamethasone suppression test is used to evaluate the risk of Cushing syndrome.

- One dose of 15 mcg/kg (max 1 mg) dex po at 11 p.m., and check cortisol the following morning between 7 a.m. and 9 a.m.
- Cortisol should be <2.0 mcg/dL.

**Diabetes**

- Screen for diabetes every three years in asymptomatic, obese children ages 10 to 19 years old with a family history of Type 2 diabetes, high-risk race or signs of insulin resistance. There is no agreed upon best test (fasting glucose, random glucose, HbA1c).
- Insulin levels do not effectively predict future Type 2 diabetes.
- Apart from lifestyle management, there is no approved therapy for children with prediabetes. Patients with prediabetes that persists after a serious effort to manage lifestyle for greater than six months may benefit from metformin treatment or an endocrine consult.
- A diabetes education consultation or a referral to Strong4Life can be arranged through Children’s Healthcare of Atlanta for children with prediabetes.

**High LDL cholesterol**

- Ensure a fasting sample was obtained.
- Take an average of two samples drawn two to 12 weeks apart when patient is not acutely ill.
- Check for primary disease-causing high LDL cholesterol (i.e., fasting CMP, TSH and urinalysis).
- For moderate elevation (130-189 mg/dL), lifestyle management is recommended for all patients. If no response within six months, evaluate for the following risk factors:
  - Hypertension
  - Smoking
  - Diabetes
  - Nephrotic syndrome
  - Renal failure
  - Renal transplant
  - History of Kawasaki disease
  - HIV
  - Chronic inflammation
  - Cancer survivor
  - Family history of premature cardiovascular disease
- If a high-risk factor is present, the child may benefit from lipid clinic consult.
- If LDL ≥190 mg/dL, a referral to the lipid clinic is recommended irrespective of risk factors present.
High fasting triglycerides

High triglycerides with low HDL cholesterol is common in obese children. Children with severely low HDL (<20 mg/dL) may benefit from a lipid clinic consult.

- Ensure fasting sample was obtained.
- Take an average of two samples drawn two to 12 weeks apart when patient is not acutely ill.
- Check for primary disease-causing high triglyceride (i.e., fasting CMP, TSH and urinalysis).
- Abnormal levels that are <300 mg/dL may respond to lifestyle management plus or minus fish oil.
- Levels >300 mg/dL may benefit from a lipid clinic consult.

Polycystic ovarian syndrome (PCOS)

Normal variations in adolescents can make a PCOS diagnosis difficult using standard criteria. Minimum requirements for diagnosis include:

- Irregular or absent ovulation
- Clinical signs of high androgens (e.g., hirsute and severe acne)

Differential diagnosis of adrenal disease or an ovarian tumor can be evaluated with minimal investigation.

- 17-hydroxyprogesterone
- Free testosterone
- DHEA-S
- TSH
- Fasting complete metabolic profile
- Fasting lipid profile
- hCG (urine or serum)
- ± 25 (OH) vitamin D

A combined oral contraceptive pill (OCP) is the first line of therapy. Use OCP with low androgen activity. Consider the risk for thrombosis before starting oral contraceptive. Metformin is used by some, but it is not a Food and Drug Administration (FDA)-approved indication.

Evaluating complications of obesity

Thyroid function testing

- If initial thyroid-stimulating hormone (TSH) is high but <9 uIU/mL, palpate thyroid gland and repeat TSH and Free T4. Get thyroid peroxidase autoantibody (TPO) and antithyroglobulin autoantibodies.
- If there is no goiter, TSH remains minimally elevated and autoantibodies are both negative, TSH should return to normal after weight loss is achieved.
- If there is a goiter present, TSH rises above 9 uIU/mL or either autoantibody is positive, a referral to endocrinology is indicated.

Contact us

Call 404-785-DOCS (5437) to make a referral or for a physician-to-physician consult.

Visit choa.org/md for more information and to access our online referral form.
The recommendations in the following guideline do not indicate an exclusive course of treatment. The intent is to build a multifaceted system of care for pediatric patients and provide a framework for clinical decision-making.

Health history is key in determining if a seizure has occurred and if it is the first episode. History should be as detailed as possible and given from a reliable observer. This will help determine what further evaluation is necessary.

Documentation should include:

**History**
- Age
- Family history of seizures
- Developmental status
- Behavior
- Health at seizure onset (fever, illness, exposures to illness, sleep)
- Past medical history
- Precipitating events other than illness (trauma, toxins, ingestions)

**Seizure characteristics**
Detailed description of all aspects of the seizure, including:
-Aura (subjective)
- Behavior (mood or behavior changes prior to onset)
-Vocal symptoms (cry, speech changes)
-Motor symptoms, including, but not limited to:
  - Head or eye movements
  - Jerking
  - Posturing
  - Stiffening
  - Automatisms (lip smacking, finger rolling)

- Generalized or focal movements
- Respiratory symptoms (change in pattern or cyanosis)
- Autonomic symptoms (drooling, incontinence, pallor, vomiting)
- Decrease or loss of consciousness
- Duration of the seizure

**Symptoms following seizure**
- Amnesia
- Confusion
- Lethargy
- Sleepiness
- Headaches
- Muscle aches
- Transient focal weakness
- Nausea or vomiting

In addition a complete physical exam, a complete neurologic exam should be performed and documented.

**Lab evaluation**
For patients younger than 6 months old, there is some evidence to support lab screening in the absence of specific suggested features. For patients older than 6 months old, routine lab screens are not recommended for first nonfebrile seizures without suggestive history or symptoms. Suggested lab screens include serum electrolytes, including calcium and magnesium.

Lab tests should be ordered based on the patient’s clinical characteristics and history, such as vomiting, diarrhea, dehydration or persistent abnormal mental status.
- If there is any concern for drug exposure or abuse, perform a toxicology screening.
- If case suggests meningitis or encephalitis, perform a lumbar puncture.
**Electroencephalogram (EEG)**

An EEG is recommended as part of the evaluation for all children with a first-time unprovoked nonfebrile seizure to determine seizure classification and epilepsy syndrome.

**Diagnostic imaging**

The goal of the initial imaging is to try to classify the seizures as focal or generalized.

Many generalized seizures have focal onset, which is often missed but frequently associated with focal epileptiform on an EEG, and therefore will be classified as a focal seizure with second generalization.

Emergent neuroimaging is indicated for children with persistent postictal neurological deficits or for abnormal mental status persisting for several hours after the seizure. Request an urgent neurology consult.

Nonemergent imaging is indicated in children with abnormal development and/or a history of abnormal neurological examination if neuroimaging has not been done before. Nonemergent imaging is an MRI of the brain.

After the second seizure or focal seizure, a nonemergent MRI is always indicated. Children of all ages are possible candidates for neuroimaging.

**Diagnosis**

Identify the diagnosis

• Dx1 seizure type: focal or generalized
• Dx2 epilepsy syndrome (remote): can be either symptomatic or genetic
  – Symptomatic: Focal lesion on imaging, intellectual disability, neurological abnormality, etc.
  – Genetic (presumptive): Absence, juvenile myoclonic, benign rolandic epilepsy, positive family history, etc.

**Recurrence**

It is difficult to predict if a child will have a second seizure. Many children will not have a recurrence. Risk for seizure recurrence for developmentally normal children with normal imaging and EEG is 33 percent. Risk of seizure recurrence with an epileptiform EEG generally exceeds 70 percent.

**Treatment**

If the first seizure is status epilepticus (a seizure that lasts at least five minutes), consider initiating anticonvulsant therapy. Physicians may consider providing a prescription for rectal Diastat to be used for subsequent seizure lasting longer than five minutes. Remember to provide the guardian with seizure first-aid education, instructions on how to use Diastat and directions to call 911 the first time Diastat is given.

- The protocol for Diastat AcuDial is based on age and weight:
  - Ages 2 to 5: 0.5 mg/kg
  - Ages 6 to 11: 0.3 mg/kg
  - Ages 12 and up: 0.2 mg/kg

- Doses are available in 2.5 mg intervals, so dosages should be: 2.5, 5, 7.5, 10, 12.5, 15, 17.5 or 20 mg.
- Diastat cannot be in doses larger than 20 mg for any age.
- There is a smaller Diastat tip (4.4 cm) for smaller children (the larger tip is 7 cm).
- The syringes are available in 2.5 mg, 10 mg and 20 mgs (the pharmacist should lock the syringe at the appropriate dose; green ring will appear when this is done).

**Referral is indicated for:**

- Prolonged, focal or second seizures or developmental delay/neurodevelopmental disability
- Findings on initial workup indicating underlying etiology or true epileptic syndrome (developmental delay, abnormal neurological exam, abnormal neuroimaging or abnormal EEG)
- Patient or parental anxiety

Documentation of medical history and physical, including all indicated laboratory, neuroimaging and neurodiagnostic studies, should be provided to the consulting physician.

**References**

**Acknowledgments**

A special thanks to Kids Health First and Joann Janas, MD, for their original protocol development, which is evidence-based and therefore part of this guideline. Kids Health First has been using this protocol for several years and has experienced positive outcomes with managing their patients with their first-time unprovoked seizure.

This guideline was developed through the efforts of Children’s Healthcare of Atlanta and physicians on the Children’s medical staff in the interest of advancing pediatric healthcare. This guideline is a general guideline and does not represent a professional care standard governing providers’ obligation to patients. Ultimately, the patient’s physician must determine the most appropriate care.

If your patient has an emergent or life-threatening condition, stop and call 911, or send him to the nearest hospital emergency department.
## Primary care guideline for new-onset seizure

**First-time unprovoked nonfebrile seizure assessment**

**Emergent imaging and neurology consult are needed if the patient has:**

• Persistent postictal neurological deficits
• Abnormal mental status persisting several hours after seizure
3. Identify diagnosis and treatment

**Identify diagnosis**
- Dx1 seizure type—focal or generalized (EEG can help classify)
- Dx2 epileptic syndrome—symptomatic (abnormal MRI or neurodevelopmental disability) or genetic (presumptive)

**Treatment**
- Prescribe the rectal gel Diastat as needed for recurrent seizure.
- Provide the guardian with seizure first-aid education (turn patient on side and keep track of how long seizure lasts), instructions on how to use Diastat (if the seizure continues longer than five minutes, give Diastat rectally) and directions to call 911 after using Diastat for the first time.

4. Determine need for referral to neurologist

**Referral is indicated for:**
- Prolonged or second seizure
- Developmental delay/neurodevelopment disability
- Initial workup finding underlying etiology or true epileptic syndrome
- Patient or parental anxiety

**Neurologists are available for consultations Monday through Friday.**
- 8 a.m. to 5 p.m.
- Phone: 404-785-DOCS (3627)

Documentation of medical history and a physical, including all indicated laboratory, neuroimaging and neurodiagnostic studies, should be provided to the consulting physician.

This guideline was developed through the efforts of Children’s Healthcare of Atlanta and physicians on the Children’s medical staff in the interest of advancing pediatric healthcare. This guideline is a general guideline and does not represent a professional care standard governing providers’ obligation to patients. Ultimately the patient’s physician must determine the most appropriate care.

If your patient has an emergent or life-threatening condition, stop and call 911, or send him to the nearest hospital emergency department.

Sports medicine physician vs. sports physical therapist

A reference guide

These guidelines are intended to support your clinical decision on whether your patient should see an orthopedic physician or a sports physical therapist. Follow the center categories and choose the appropriate corresponding column based on your patient’s case history. If the majority of responses fall in the acute macrotraumatic injury column, we recommend the patient see an orthopedic physician. Conversely, if most responses fall in the chronic microtraumatic injury column, the patient may be sent directly to sports physical therapy.

About our Sports Medicine Program

The Sports Medicine Program at Children’s Healthcare of Atlanta is one of the only programs in the country dedicated exclusively to caring for growing athletes. Our sports medicine professionals, including sports medicine primary care physicians and sports physical therapists, deliver a complete package of care, from diagnosis to treatment and rehabilitation. We have 14 orthopedic and sports medicine clinics, and offer sports physical therapy at 11 locations across metro Atlanta.

Visit choa.org/md to access our referral forms or choa.org/ortho for more information, including a list of our locations and providers.

Extremity pain
upper/lower extremity

If your patient has an emergency or life-threatening condition, stop and call 911 or send him to the closest hospital emergency department.
