

Changes to outpatient rehab services

Children'sSM
Healthcare of Atlanta

What your practice needs to know

After performing an in-depth analysis of our outpatient rehabilitation resources, Children's Healthcare of Atlanta has determined our most important role in the community is to ensure children with complex medical conditions receive the care they need as there are often very few, if any, pediatric options in the market. With this in mind, we have decided to move to a more consolidated approach so we can shift our focus more to children with complex conditions. As part of this decision, Children's will consolidate outpatient rehabilitation services currently offered at six of our neighborhood locations to our remaining three sites.

When are these changes taking place?

These changes will take place by Dec. 31, 2019.

Which locations are impacted?

The locations impacted include Children's at Alpharetta Highway, Children's at Mount Zion, Children's at Sandy Plains, Children's at Forsyth, Children's at Fayette and Children's at Satellite Boulevard.

What services are impacted?

Audiology and outpatient rehabilitation will no longer be offered at these locations. Note, sports medicine physical therapy will still be offered at all current locations except Children's at Sandy Plains. Sports medicine physical therapy at our Sandy Plains office will move to Children's at Town Center Outpatient Care Center.

Where can my patients go for outpatient rehabilitation services in the future?

Children's will continue to offer audiology and outpatient rehabilitation at the following locations:

- **Children's Medical Office Building at Scottish Rite hospital:** 5461 Meridian Mark Road NE, Atlanta, GA 30342
- **Children's at North Druid Hills:** 1605 Chantilly Road NE, Atlanta, GA 30324
- **Children's at Town Center Outpatient Care Center:** 605 Big Shanty Road NW, Kennesaw, GA 30144

Continue to call one of the phone numbers below to make a referral.

- **Outpatient rehabilitation:** 404-785-7100
- **Audiology:** 404-785-7174

Are any locations closing?

With the consolidation of services, Children's will close Children's at Alpharetta Highway and Children's at Mount Zion. Services at Children's at Sandy Plains, to include sports medicine physical therapy and orthotics and prosthetics, will move to Children's at Town Center Outpatient Care Center. Additionally, orthotics and prosthetics at Children's at Mount Zion will move to Children's at Fayette.

Children's at Forsyth, Children's at Fayette and Children's at Satellite Boulevard will remain open and continue to offer other pediatric specialty services.

Why did Children's make this decision?

At Children's, high quality, specialized pediatric care is what sets us apart. By consolidating these outpatient clinics, Children's can focus on these services across our remaining locations to ensure the best long-term success for our patients.
