This agenda is subject to change.
Course Description
This conference for hearing healthcare professionals will focus on a variety of medical conditions related to pediatric hearing loss including congenital cytomegalovirus, Zika virus, autism spectrum disorders and pediatric cancer. This conference will also address the challenges of delivering a hearing loss diagnosis to a family and providing empathetic support to them. Experts from the fields of Audiology, Otolaryngology, Autism, and Oncology will provide an in-depth look into advanced topics for the pediatric Audiology practitioner. Conference participants will have the unique opportunity to dialogue with highly respected professionals whose insight will enrich the management of pediatric patients with hearing loss.

Who Should Attend
This course is designed for audiologists, as well as speech therapists, occupational therapists, or physical therapists who have an interest in learning more about hearing loss in these patient populations. Parents who are involved with children with these diagnoses are also welcome to attend.

Objectives
At the conclusion of the workshop, participants will be able to:
• Describe the sequela of a congenital CMV infection
• Discuss audiological follow up for children with CMV
• Explain the timeframe for definitive CMV diagnosis
• Review history and progression of hearing loss technology
• Discuss up and coming technology and single side deafness
• Discuss the importance of early screening, detection, and intervention in autism as well as barriers to each
• Review the assessment of ASD in very young children and early intervention methods
• Explain new intervention models for autism that are community-viable and sustainable
• Describe late effects from cancer treatment in childhood cancer survivors.
• Summarize the risk factors associated with hearing loss in childhood cancer survivors.
• Describe screening recommendations for hearing loss in childhood cancer survivors.
• Identify how a diagnosis might impact a parent and child's newly forming relationship.
• Discuss how audiology professionals can better support parents when sharing the identification of a child's hearing loss.
• Describe how Infant Mental Health tenets can be applied to the work of an audiologist

This educational activity does not necessarily reflect the views, opinions, policies or procedures of Children's Healthcare of Atlanta, its staff or representatives. Children's cannot and does not assume any responsibility for the use, misuse or misapplication of any information provided.
