Course Description
The purpose of this course is to help clinicians recognize the symptoms and best mode of treatment for common pediatric emergencies such as head injuries, asthma, the febrile infant, and child abuse. In addition, clinicians will learn what can best be treated in the office versus the hospital settings.

Who Should Attend
This course is designed for general pediatricians, pediatric and adult emergency medicine physicians, urgent care physicians, and advanced practice providers.

Objectives
At the completion of this conference, the participant should be better able to:

- Describe the latest approach and management of common pediatric emergencies.
- Recognize common pediatric emergencies that require decisive and immediate management.
- Compare and contrast different care settings and levels of patient care.
