

# Hematology-Oncology ICD-10 documentation

## Seven key impacts to ICD-10 documentation

1. Disease or disorder site
2. Acuity and/or encounter status of treatment
3. Etiology, causative agent, or disease type and injury/  
poisoning cause, intent, activity at the time of the event  
and place event occurred
4. Underlying and associated conditions
5. Manifestations
6. Complications or adverse events
7. Supporting info such as lab values or socioeconomic key  
impacts to ICD-10 documentation

## Most commonly used diagnoses

ICD-9 Name	ICD-9 Code	ICD-10 Code	ICD-10 Name	Documentation tips
Acute lymphoid leukemia in remission	<b>204.01</b>	<b>C91.01</b>	Acute lymphoblastic leukemia, in remission	Leukemia <ul style="list-style-type: none"> <li>• Specify the type (e.g. Acute lymphoblastic)</li> <li>• Identify disease status as being:                             <ul style="list-style-type: none"> <li>o In remission</li> <li>o Not having achieved remission</li> <li>o In relapse</li> </ul> </li> </ul>
Acute myeloid leukemia without mention of having achieved remission	<b>205.00</b>	<b>C92.00</b>	Acute myeloblastic leukemia, not having achieved remission	
		<b>C92.40</b>	Acute promyelocytic leukemia, not having achieved remission	
		<b>C92.50</b>	Acute myelomonocytic leukemia, not having achieved remission	
		<b>C92.60</b>	Acute myeloid leukemia with 11q23-abnormality not having achieved remission	
		<b>C92.A0</b>	Acute myeloid leukemia with multilineage dysplasia, not having achieved remission	

ICD-9 Name	ICD-9 Code	ICD-10 Code	ICD-10 Name	Documentation tips
Bloodstream infection due to central venous catheter	<b>999.32</b>	<b>T80.211A</b>	Bloodstream infection due to central venous catheter, initial encounter	Refer to 7 key impacts of ICD-10 documentation
Congenital factor VIII disorder	<b>286.0</b>	<b>D66</b>	Hereditary factor VIII deficiency	
Immune thrombocytopenic purpura	<b>287.31</b>	<b>D69.3</b>	Immune thrombocytopenic purpura	
Malignant neoplasm of brain, unspecified	<b>191.9</b>	<b>C71.9</b>	Malignant neoplasm of brain, unspecified	Neoplasms <ul style="list-style-type: none"> <li>• Identify the site (e.g. brain stem)</li> <li>• State the morphology (e.g. malignant, benign, in situ, etc.)               <ul style="list-style-type: none"> <li>o Uncertain behavior</li> <li>o Unspecified behavior</li> </ul> </li> <li>• Indicate the stage and any metastatic sites</li> <li>• List any related exposure to smoke (second hand smoke)</li> <li>• Detail when presented for treatment related to neoplasm (e.g. surgical removal, chemotherapy, immunotherapy, radiation therapy)</li> </ul>
Neoplasm of unspecified nature of brain	<b>239.6</b>	<b>D49.6</b>	Neoplasm of unspecified behavior of brain	

The ICD-10 Provider Specialty Tool Kit is meant to assist providers with documentation best practices necessary for the transition from ICD-9-CM to ICD-10-CM. This tool kit includes the most commonly used diagnoses for a specialty using 2012 claims data for top encounters and top number of dollars per diagnosis. The tool kit can be used as a quick reference guide for providers and can also be shared with Practice Managers. This tool kit is not meant to be a coding cross walk and therefore should not be used as such. Questions regarding this tool kit and/or ICD-10 should be submitted via email to ICD10@choa.org.
