ICD-10 documentation

Seven key impacts to ICD-10 documentation

1. Disease or disorder site
2. Acuity and/or encounter status of treatment
3. Etiology, causative agent, or disease type and injury/
poisoning cause, intent, activity at the time of the event
and place event occurred
4. Underlying and associated conditions
5. Manifestations
6. Complications or adverse events
7. Supporting info such as lab values or socioeconomic key

		R25.3	Fasciculation	
		R25.8	Other abnormal involuntary movements	
R25.9	Unspecified abnormal involuntary movements			
Headache	784	G44.1	Vascular headache, not elsewhere classified R51 Headache	Headache <ul style="list-style-type: none"> • Identify the type, such as: <ul style="list-style-type: none"> o Cluster, tension, or par oxysmal hemicranias (specify when episodic or chronic) o Post traumatic (acute or chronic, include info regarding any postconcussional syndrome) o Drug-induced (provide info regarding associated medication)

The ICD-10 Provider Specialty Tool Kit is meant to assist providers with documentation best practices necessary for the transition from ICD-9-CM to ICD-10-CM. This tool kit includes the most commonly used diagnoses for a specialty using 2012 claims data for top encounters and top number of dollars per diagnosis. The tool kit can be used as a quick reference guide for providers and can also be shared with Practice Managers. This tool kit is not meant to be a coding cross walk and therefore should not be used as such. Questions regarding this tool kit and/or ICD-10 should be submitted via email to ICD10@choa.org.
