Patient family resources

404-785-KIDS (5437)
This number is the primary point of contact for patient families. This phone number, staffed by a team of experienced Children's Healthcare of Atlanta representatives, is open 24 hours a day, seven days a week. Patient families can use 404-785-KIDS (5437) to:
• Access Children’s services.
• Schedule and change appointments.
• Reach a physician or department at Children’s.

MYchart
MYchart gives you, your patients and their legal guardians access to a portion of their Epic medical record. It also enables you and your patients to communicate through a secure online portal or mobile device. With MYchart, your patient families can be more informed, which can lead to improved satisfaction and outcomes. Patient families can:
• View immunization records.
• View lab and other test results, and get notifications when most results are received.
• Request prescription refills.
• Communicate with you by sending and receiving secure messages.

Patient families should visit mychart.choa.org to activate a MYchart account.

Choa.org
Patient families can use the Children’s website to:
• Learn more about our medical services and physicians on our medical staff.
• Find information, including hours and directions to specific locations.
• Prepare for visits and overnight stays.
• Request copies of medical records.
• Contact our team with questions about billing and insurance.

Mobile app
Text the word KIDS to 770-766-3111 to receive a link to the free Children’s mobile app directly on your phone. You can also visit the App Store or Google Play to download the Children’s app for your smartphone or tablet.

With the Children’s app, patient families can:
• Find a hospital or neighborhood location.
• Locate a department, patient room or amenity within the hospital.
• Look up Children’s physicians who see patients at one of our facilities.
• Find our nearest Emergency Department and see wait times.
• Find our nearest Urgent Care Center, see wait times and save your spot in line.
• Access your patient information through MYchart.
Children’s offers urgent care, radiology, lab and emergency services at the following locations:

1. **Egleston hospital**
   1405 Clifton Road NE
   Atlanta, GA 30322
   Emergency Department, lab and radiology: CT, DEXA, fluoroscopy, interventional radiology, MRI, nuclear medicine, PET, sedation, ultrasound and X-ray

2. **Hughes Spalding hospital**
   35 Jesse Hill Jr. Drive SE
   Atlanta, GA 30303
   Emergency Department and radiology: fluoroscopy, ultrasound and X-ray

3. **Scottish Rite hospital**
   1001 Johnson Ferry Road NE
   Atlanta, GA 30342
   Emergency Department, lab and radiology: CT, DEXA, fluoroscopy, interventional radiology, MRI, nuclear medicine, sedation, ultrasound and X-ray

4. **Children’s at Chamblee-Brookhaven**
   In the Parkview on Peachtree shopping center
   5080 Peachtree Blvd., Suite 100
   Chamblee, GA 30341
   Urgent care

5. **Children’s at Cherokee**
   In the River Pointe shopping center
   1558 Riverstone Parkway, Suite 100
   Canton, GA 30114
   Urgent care

6. **Children’s at Forsyth**
   In The Collection at Forsyth
   410 Peachtree Parkway, Suite 300
   Cumming, GA 30041
   Urgent care, lab and X-ray*

7. **Children’s at Hamilton Creek**
   In the Hamilton Mill Town Center shopping center
   2240 Hamilton Creek Parkway, Suite 600
   Dacula, GA 30019
   Urgent care

8. **Children’s at Hudson Bridge**
   In the Hudson Bridge Crossing shopping center
   1510 Hudson Bridge Road
   Stockbridge, GA 30281
   Urgent care, lab and X-ray*

9. **Children’s at North Point**
   3795 Mansell Road
   Alpharetta, GA 30022
   Urgent care

10. **Children’s at Satellite Boulevard**
    2660 Satellite Blvd.
    Duluth, GA 30096
    Urgent care, lab and radiology*: X-ray and ultrasound

11. **Children’s at Town Center**
    625 Big Shanty Road NW
    Kennesaw, GA 30144
    Urgent care, lab and radiology*: CT, fluoroscopy, MRI, sedation, ultrasound and X-ray

12. **Children’s at Webb Bridge**
    3155 North Point Parkway
    Building A, Suite 150
    Alpharetta, GA 30005
    Lab and radiology*: CT, fluoroscopy, MRI, sedation, ultrasound and X-ray

Children’s Healthcare of Atlanta at Hughes Spalding es propiedad de Fulton-DeKalb Hospital Authority y es dirigido por HSOC Inc., institución asociada a Children’s.
Physician resources

As one of the largest pediatric healthcare systems in the country, Children’s offers a variety of ways for physicians to reach our staff and clinical services. Visit choa.org/md for more information about these services as well as access to our online forms.

AccessCHOA

AccessCHOA is the web-based interface for the Children's electronic health record system. It provides customized notifications about patient events, which can be forwarded to anyone in your practice. In addition, you can use it to:

• Place an order for outpatient diagnostics and rehabilitation.
• Place referrals to Children’s Physician Group specialists and specialty clinics.
• View notifications about key patient events, including admissions and discharges, emergency visits, and lab and imaging results.
• Check appointment status and patient scheduling information. AccessCHOA is the primary way your practice will receive patient information. To enhance patient confidentiality, Children’s will eventually eliminate faxing patient information to your practice.

Ask your physician liaison or visit accessCHOA.org to register and review educational resources. See the Tools section for a tip sheet about accessCHOA.

404-785-DOCS (3627)

Children’s recognizes that complex navigation is sometimes required to access healthcare services. By using this easy-to-remember phone number, physicians can connect to anyone or any service within our organization.

404-785-DOCS is staffed 24 hours a day, seven days a week by a team of experienced Children’s representatives who will promptly answer your call, evaluate your needs, provide the services requested or route you to the appropriate area.

Call 404-785-DOCS (3627) to:

• Access any Children's service.
• Reach a patient, employee or department at Children’s.
• Collaborate on patient care.
• Schedule a patient appointment or ancillary test.
• Refer a patient to a Children’s Physician Group practice.
• Speak to a Children’s Physician Group provider during business hours through our physician-to-physician service.

Transfer Center

The Children’s Transfer Center can arrange for the acceptance and admission of your patient with one phone call, 24 hours a day, seven days a week. We can help:

• Coordinate ground or air transportation for your patient.
• Arrange for a bed with the appropriate level of care to be ready upon arrival.
• Initiate registration paperwork, including financial information and pre-certification.

Call 888-785-7778 or 404-785-7778 to reach our Transfer Center.

Scheduling elective admissions:

If you need to schedule an admission to Children’s and you do not have attending privileges, the Children’s Hospitalist Program can assist you with:

• Telephone consultations.
• Inpatient management services.
• Outpatient diagnostic referrals.
• Specialist referrals.

See the Tools section for our Emergency Department transfer guidelines.

Virtual visits

The expertise of our pediatric specialists is available to patients through virtual visits. Virtual visits allow providers to connect with patients in real time using video through a computer, smartphone or tablet. Our providers will determine whether an appointment can be done through a virtual visit.

Refer your patients for an in-person visit with one of our pediatric specialists. They will determine if a virtual visit is appropriate.

Call 404-785-DOCS (3627) to schedule an appointment.
Physician Portal

The Children's Physician Portal offers easy access to clinical reference tools and resources for members of the Children's medical staff, including:

- Clinical care guidelines to help you provide high-quality care.
- System leader contacts and structure to help you engage with your leaders.
- Professional development and continuing medical education (CME) tools and credit opportunities.
- A Children's medical staff directory.
- Curated medical news, strategies and other information.
- Wellness tools and resources to support your personal well-being.

Access the Physician Portal using your Children's network ID and password at md.choa.org. If you have forgotten your ID or password, or need one, contact the Children's Solution Center at 404-785-6767.

The Children’s Care Network (TCCN)

The Children’s Care Network (TCCN) is a clinically integrated partnership between Children’s and community physicians designed to help facilitate better health outcomes for our patient population. The collaborative system also offers group purchasing power, cost savings and technical resources.

To find out more about our clinically integrated network, email contact@tccn-choa.org, call 404-785-7935 or visit tccn-choa.org.

Physician outreach

A physician liaison is your primary contact for questions, concerns and issues. Physician liaisons help with:

- Barriers to access.
- In-services.
- Order forms or materials.

To learn more visit choa.org/outreach.

Children’s Physician Group

About us

Children’s Physician Group is one of the largest multispecialty pediatric physician practices in the Southeast, with nearly 500 physicians and more than 350 advanced practice providers who are employed by Children’s Healthcare of Atlanta and/or serve as members of the pediatric faculty at the Emory University School of Medicine.

With convenient locations at our three hospitals and multiple neighborhood locations in Atlanta and surrounding communities, our pediatric-trained doctors and surgeons represent more than 30 pediatric specialties.

Pediatric specialties

- Allergy and immunology
- Anesthesia
- Apnea
- Cardiothoracic surgery
- Child advocacy
- Critical care
- Cystic fibrosis (CF)
- Dentistry and orthodontics
- Emergency medicine
- Endocrinology
- Gastroenterology
- General surgery
- Gynecology
- Hematology/oncology
- Hepatology
- Hospitalists
- Infectious diseases
- Interventional radiology
- Neonatology
- Nephrology
- Neurology
- Neuropsychology
- Neurosurgery
- Nutrition
- Orthopaedics and sports medicine
- Otolaryngology
- Pathology
- Physiatry
- Plastic surgery and craniofacial
- Pulmonology
- Radiology
- Rheumatology
- Sedation services
- Sleep
- Transplant

Multispecialty clinics

Children’s Physician Group providers also participate in several multispecialty clinics, including:

- 22q Deletion
- Aerodigestive
- Cerebral Palsy
- Cerebrovascular Disorders
- Chronic Kidney Disease
- Concussion
- Craniofacial Feeding
- Craniofacial Speech
- Developmental Neurology
- Developmental Progress
- Differences of Sexual Development
- Epilepsy/Ketogenic Diet
- Genetics
- Hypertension
- Infantile Spasms
- Leukodystrophy
- Medically Complex
- Muscular Dystrophy
- Neuro Metabolic
- Neuro Spine
- Neurofibromatosis
- Neurogastroenterology and Motility
- Neuromuscular
- New Onset Seizures
- Pain Relief
- Pelvic and Anorectal
- Skeletal Dysplasia
- Spasticity
- Spina Bifida
- Strong4Life
- Technology Dependent
- Tuberous Sclerosis
- Vagus Nerve Stimulation
- Vascular Anomalies

Visit choa.org/cpg for additional information about our specialties and clinics.
Physician-to-physician service

Physician-to-physician is a service offered through 404-785-DOCS (3627). The goal of this service is to provide you with improved access to Children’s Physician Group practices during business hours. A designated provider for participating Children’s Physician Group practices is available Monday through Friday from 8 a.m. to 5 p.m., excluding holidays, to respond to your non-urgent clinical inquiry.

Physician-to-physician consultations should be requested when you need to speak with a subspecialist for advice about a patient. It should not be used for questions that do not require a subspecialist physician, such as lab results or appointment scheduling.

Enhancements

To improve your experience with our physician-to-physician service and better meet your needs, we have made the following enhancements:

• **Non-urgent, established patients:** Our turnaround time has been designated to 24 hours.

• **Urgent, established or non-established patients:** Our turnaround time has been designated to 60 minutes. In more than 60% of cases, you will be connected directly with a subspecialist.

• **Escalation:** If you do not receive a call back in the designated time frame, call 404-785-DOCS (3627) and your call will be escalated to practice leadership.

Four ways to refer a patient

At Children’s Physician Group, we want to make it easy for you to submit a referral to our pediatric specialty practices.

To refer a patient, use one of the following four methods:

• **accessCHOA:** AccessCHOA is a free, secure, web-based electronic health record system that provides physicians the ability to electronically submit referrals to Children’s Physician Group specialists. It also provides instant access to your patients’ information, customized notifications about patient events and the ability to view the referral status and results.

• **choa.org/md:** Visit the Physician Resource page on the Children’s website for access to the Children’s Physician Group online referral form. Upload relevant clinical documents, patient demographics and imaging/diagnostic tests with the click of a button.

• **Fax:** See the Forms section for a hard copy of the Children’s Physician Group referral form. Completed forms may be faxed to 404-785-9111.

• **404-785-DOCS (3627):** This single point of contact for physicians streamlines the referral process through an easy-to-remember phone number. 404-785-DOCS is staffed 24 hours a day, seven days a week. Call 404-785-DOCS and ask to speak with the clinical referral team to receive the status of your referral. Our clinical referral team is available Monday through Friday from 8 a.m. to 5 p.m. for any questions or concerns regarding your patient’s clinical referral.

See the Contact information section for a listing of Children’s Physician Group ambulatory specialties, physicians and locations.

Atlanta, GA 30322

Physicians:

Paul Chai, MD
Chief, Cardiothoracic Surgery
Co-Chief, Heart Center
Assistant Professor, Emory University School of Medicine
Interests: congenital heart disease, heart transplant, pediatric mechanical support systems

Joshua Rosenblum, MD, PhD
Assistant Professor, Emory University School of Medicine
Interests: congenital cardiac surgery, adult congenital cardiac surgery, heart transplant and mechanical support

Kirk Kanter, MD
Director, Heart Transplant Program
Professor, Emory University School of Medicine
Interests: congenital heart disease, heart transplant, mechanical circulatory support

Subhadra Shashidharan, MD
Assistant Professor, Emory University School of Medicine
Interests: neonatal cardiac surgery, heart transplant, thoracic surgery

Fawwaz Shaw, MD
Assistant Professor, Emory University School of Medicine
Interests: neonatal heart surgery, extracorporeal life support

CONCUSSION (CONTINUED)

Neurosurgeon: Andrew Reisner, MD
Medical Director, Concussion Program
Medical Director, Neuro Trauma and Concussion
Interests: brain tumors, concussions, Gamma knife radiosurgery, hydrocephalus, pituitary disorders and tumors

Neuropsychologists: Laura Blackwell, PhD
Interests: acquired brain injury, chronic pain, concussion, pediatric neuropsychology, traumatic brain injury

Thomas Burns, PsyD, ABPP/CN
Director, Concussion Research
Director, Neuropsychology
Interests: acquired brain injury, cerebral palsy, concussion, epilepsy, neuroimaging

Elyssa Gerst, PhD
Interests: cognitive development in children with complex medical histories, impact of congenital or acquired neurological disorders on neuropsychological functioning

Jacqueline Kiefel, PhD
Interests: concussion, Duchenne muscular dystrophy, neurofibromatosis, spina bifida, traumatic brain injury

Laura Wright, PhD
Pediatric Psychologist
Interests: pain assessment and treatment, chronic pain, promotion of resilience and adaptation among youth who experience pain

Sports medicine physicians: David Marshall, MD
Medical Director, Sports Medicine
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

Armand Scurfield, MD
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

J. Stephen Kroll, MD
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

Physiatrists: Laura Jones, MD

Udayan Kulkarni, MD

Elizabeth Poplawski, DO

Joshua Vova, MD, FAAP, FAAPMR
Medical Director, Rehabilitation

Neurologists: Barbara Weissman, MD
Medical Director, Neurology Quality
Associate Professor, Emory University School of Medicine
Interests: neurorehabilitation, cerebral palsy, traumatic brain injury, concussion, general pediatric neurology

Jasmine Forte, MD
Assistant Professor, Emory University School of Medicine
Interests: general pediatric neurology, migraines, concussion, idiopathic intracranial hypertension, sports neurology, tension-type headaches

NEUROLOGY

Children’s Physician Group

404-785-DOCS (3627) 404-785-9111

Egleston hospital
1405 Clifton Road NE
Atlanta, GA 30322

Scottish Rite hospital
1001 Johnson Ferry Road NE
Atlanta, GA 30342
Service: Epilepsy Center

Northside Professional Center (Mon-Fri)
975 Johnson Ferry Road, Suite 340
Atlanta, GA 30304
Specialty clinics: epilepsy, infantile spasms, ketogenic diet, new onset seizures, vagus nerve stimulation
Drs. Al-Ramadhani, ElKay, Zhang

Hughes Spalding hospital (Wed p.m.)
35 Jesse Hill Jr. Drive SE
Atlanta, GA 30303
Multiple physicians

Athens-St. Mary’s (4th Tue)
on the St. Mary’s Hospital campus
1230 Baxter St.
Athens, GA 30606
Dr. Weissman

Children’s at Forsyth (1st, 3rd and 5th Thu)
In The Collection at Forsyth
140 Peachtree Parkway, Suite 300
Cumming, GA 30041
Dr. Keller

Center for Advanced Pediatrics (Mon-Fri)
1400 Tullie Road NE, Fourth Floor
Atlanta, GA 30329
Specialty clinics: cerebrovascular disorders, complex headache, concussion, cerebral palsy, developmental neurology, epilepsy, epilepsy surgery, infantile spasms, ketogenic diet, leukodystrophy, movement disorder, neonatal, neuroimmunology, neuro metabolic, new onset seizures
Drs. Bhatta, Dutt, Eksioglu, Forte, Gedela, Gombolay, Hallman-Cooper, Holt, Keller, Kheder, Koh, Malik, Ortolani, Philbrook, Upadhyayula, Verma, Weissman, Wolf, Zhang

Physicians:

Sonam Bhalla, MD
Assistant Professor, Emory University School of Medicine
Interests: general pediatric neurology, neonatal neurology

Monideep Dutt, MD
Assistant Professor, Emory University School of Medicine
Interests: general pediatric neurology, neonatal neurology

Yaman Eksioglu, MD, PhD
Director, Comprehensive Epilepsy Center
Associate Professor, Emory University School of Medicine
Interests: surgical epilepsy, intractable epilepsy syndromes, cortical malformations of cerebral cortex, tuberous sclerosis complex, genetic epilepsy syndromes, epileptic encephalopathies

Muruvet Elkay, MD
Assistant Professor, Emory University School of Medicine
Interests: neonatal EEG, neonatal seizures, childhood epilepsy syndromes, epilepsy surgery, treatment options for medically difficult-to-treat epilepsy

Jasmine Forte, MD
Assistant Professor, Emory University School of Medicine
Interests: general pediatric neurology, migraines, concussion, idiopathic intracranial hypertension, sports neurology, tension-type headaches

Jamika Hallman-Cooper, MD
Assistant Professor, Emory University School of Medicine
Interests: cerebral palsy, pediatric stroke, Botox, general pediatric neurology

Grace Gombolay, MD
Assistant Professor, Emory University School of Medicine
Interests: neuroimmunology, multiple sclerosis, neuromyelitis optica, clinically isolated syndrome, transverse myelitis, acute disseminated encephalomyelitis (ADEM), anti-NMDA receptor encephalitis

Satyanarayana Gedela, MD
Chief, Neurology Practice Director, Children’s Physician Group–Neurology
Associate Professor, Emory University School of Medicine
Interests: epilepsy, seizures

Philip Holt, MD
Medical Director, Intra-operative Neuromonitoring
Assistant Professor, Emory University School of Medicine
Interests: childhood epilepsy, ketogenic diet therapy, intra-operative and intensive care, general pediatric neurology, autonomic disorders
### NEUROLOGY (CONTINUED)

**Stephanie Keller, MD**  
Associate Professor, Emory University School of Medicine  
**Interests:** neurogenetic and neurometabolic disorders, leukodystrophies, demyelinating diseases, general pediatric neurology

**Ammar Kheder, MD**  
Medical Director, Epilepsy Surgery and Stereo EEG  
Assistant Professor, Emory University School of Medicine  
**Interests:** epilepsy, epilepsy surgery, EEG, first seizure evaluation

**Sookyong Koh, MD, PhD**  
Marcus Professor, Neurology  
Associate Professor, Emory University School of Medicine  
**Interests:** infantile onset epilepsy, Dravet syndrome, Lennox-Gastaut syndrome, drug-resistant epilepsy, epilepsy surgery

**Manisha Malik, MD**  
Assistant Professor, Emory University School of Medicine  
**Interests:** hypersomnia, circadian rhythm disorders, insomnia

**Bryan Philbrook, MD**  
Medical Director, Cerebrovascular Services  
Assistant Professor, Emory University School of Medicine  
**Interests:** stroke, neurocritical care, epilepsy, EEG, evoked potential studies

**Saila Upadhyayula, MD, MPH**  
Assistant Professor, Emory University School of Medicine  
**Interests:** pediatric neuromuscular disorders, EMG and nerve conduction studies, muscular dystrophy, general pediatric neurology

**Guojun Zhang, MD**  
Assistant Professor, Emory University School of Medicine

**New physicians:**

**Ruba Al-Ramadhan, MD**  
Assistant Professor, Emory University School of Medicine

**Emily Kern-Smith, MD**  
(Starts Oct. 2020)  
Assistant Professor, Emory University School of Medicine

**Daniel Lowenstein, MD**  
Assistant Professor, Emory University School of Medicine

**Elissa Ortolani, MD**  
Assistant Professor, Emory University School of Medicine

**David Wolf, MD, PhD**  
Assistant Professor, Emory University School of Medicine  
**Interests:** neuro-oncology, neurofibromatosis Type 1, neurocutaneous disorders, tuberous sclerosis, general pediatric neurology

---

### NEUROPHYSIOLOGY

**Children’s Physician Group**  
404-785-2046  
404-785-2204

**Center for Advanced Pediatrics**  
1400 Tullie Road NE, Fourth Floor  
Atlanta, GA 30329  
**Services:** EEG, EMG  
A department of Scottish Rite hospital

**Egleston hospital**  
1405 Clifton Road NE  
Atlanta, GA 30322

**Scottish Rite hospital**  
1001 Johnson Ferry Road NE  
Atlanta, GA 30342
Physicians:

Nneka Morris Alexander, PhD, ABPP
Pediatric Psychologist
Interests: teacher perceptions of social functioning in children with surgically corrected congenital heart disease, self-talk interventions in sport and exercise

Donald Bearden, PhD
Interests: association between pain and neuropsychological function in children, complex neurological disorders, epilepsy, sickle cell disease

Laura Blackwell, PhD, ABPP
Interests: acquired brain injury, chronic pain, concussion, pediatric neuropsychology, traumatic brain injury

Thomas Burns, PsyD, ABPP/CN
Director, Neuropsychology
Interests: acquired brain injury, cerebral palsy, concussion, epilepsy, neuroimaging

Ashley Fournier-Goodnight, PhD, NCSP
Interests: acute acquired/trauamtic brain injury, early childhood assessment/intervention, posterior fossa syndrome, school re-entry

Cortney Fritz, PhD
Interests: inpatient and day rehabilitation, mild to moderate/severe traumatic brain injury, disorders of consciousness, pediatric cancer and stroke, evidence-based cognitive rehabilitation interventions

Robyn Howarth, PhD, ABPP
Interests: anti-NMDA receptor encephalitis, disorders of consciousness, assessment of neurocognitive status and functional outcomes during inpatient rehabilitation, neurocognitive recovery following acquired brain injury, traumatic brain injury, brain tumors

Dawn Ilardi, PhD, ABPP
Interests: atypical neurological development, cerebrovascular injury/disease, transition of care for special needs teens

Jacqueline Kiefel, PhD
Interests: concussion, Duchenne muscular dystrophy, neurofibromatosis, spina bifida, traumatic brain injury

Susan McManus Lee, PhD, ABPP
Interests: brain injuries, acute assessment and intervention following brain injury or illness, encephalitis, prematurity and perinatal complications

David Marcus, PhD, ABPP
Interests: genetics, metabolic conditions, neurofibromatosis, epilepsy, spina bifida

New physicians:

Elyssa Gerst, PhD
Interests: cognitive development in children with complex medical histories, impact of congenital or acquired neurological disorders on neuropsychological functioning

Laura Wright, PhD
Pediatric Psychologist
Interests: pain assessment and treatment, chronic pain, promotion of resilience and adaptation among youth who experience pain

Medical Director, Hip
Interests: complex hip problems, dysplasia, femoral-acetabular impingement, surgical dislocation of hip, hip sports injuries
S. Clifton Willimon, MD
Medical Director, Orthopaedic Quality and Outcomes
Interests: arthroscopic surgery of the hip, complex knee ligament reconstruction, shoulder dislocation, sports injuries

Orthopaedist:
Robert Montero, MD
Interests: Ponseti casting for clubfoot, gait abnormalities, intoeing, bow legs, knock knees, cerebral palsy

Sports medicine physicians:
John Alsobrook, MD
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

Ashley Brouillette, MD
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

John Buchanan, DO
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

J. Stephen Kroll, MD
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

New physicians:
Saji Azerf, MD
(Starts Oct. 2020)
Orthopaedist
Interests: nonoperative musculoskeletal conditions, clubfoot, fracture care

Armand Scurfield, MD
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

David Marshall, MD
Medical Director, Sports Medicine
Interests: nonoperative musculoskeletal conditions, sports injuries, overuse injuries and team sports, concussion management

Hand and Upper Extremity Program 404-785-HAND (4263)
We work closely with community orthopaedic and hand surgeons to help make sure complete, coordinated care is delivered seamlessly at our hospitals for children with conditions of the hands, arms, wrists and shoulders. We also collaborate on research and quality initiatives.

Hip Program 404-785-HIPS (4477)
Our pediatric orthopaedic surgeons help make sure that complete, coordinated care is delivered seamlessly at our hospitals for children with hip conditions. We also collaborate on research and quality initiatives.

Scoliosis Screening Program 404-785-7553 404-785-7576
Scoliosis screenings are conducted at our Children’s Physician Group–Orthopaedics and Sports Medicine practice locations. Refer to Page 31 and Page 32 for a complete listing of all locations. By appointment only.

Spine Program 404-785-1849
Our orthopaedic surgeons help make sure that complete care is delivered seamlessly at our hospitals for children with spine conditions. Our dedicated spine liaison, reachable at the above number, coordinates the patient experience by helping make sure families have the information and resources they need before, during and after care.

Orthopaedics and Sports Medicine (continued)

Sports physical therapy

Cranial Remolding Program

Limb Deficiency Program

Services offered:

- Adaptive sports
- Intelligent hand
- Limb lengthening surgery
- Prosthetics design
- Rehabilitation
- Silicone restoration

OTOLARYNGOLOGY

Children’s Physician Group  404-785-DOCS (3627)  404-785-9111

Center for Advanced Pediatrics (Mon–Fri)
1400 Tullie Road NE, First Floor
Atlanta, GA 30329
Drs. Alfonso, Goudy, Govil, Landry, Prickett, Raol

Children’s at Fayette (Tue, Fri)
In Piedmont Fayette Hospital
1265 Highway 54 West, Suite 200
Fayetteville, GA 30214
Drs. Evans, Goudy, Govil

Children’s at Hudson Bridge (Mon–Thu)
In the Hudson Bridge Crossing shopping center
1494 Hudson Bridge Road
Stockbridge, GA 30281
Drs. Landry, Raol

Children’s at Satellite Boulevard (Tue, Fri)
2660 Satellite Blvd.
Duluth, GA 30096
Drs. Brown, Prickett

Children’s at Town Center Outpatient Care Center (Mon, Wed, Thu, Fri)
605 Big Shanty Road NW
Kennesaw, GA 30144
Dr. Alfonso

Physicians:

Kristan Alfonso, MD
Assistant Professor, Emory University School of Medicine
Interests: sensorineural and conductive hearing loss, cochlear implants, chronic ear disease, external ear abnormalities, nasal and sinus disease, salivary gland disease, airway disorders, head and neck masses

Nandini Govil, MD
Assistant Professor, Emory University School of Medicine
Interests: cochlear implants, congenital and acquired hearing loss, sinusitis, head and neck masses

Nikhila Raol, MD, MPH
Assistant Professor, Emory University School of Medicine
Interests: voice disorders, sleep disorders

Steven Goudy, MD
Medical Director, Otolaryngology
Associate Professor, Emory University School of Medicine
Interests: maxillary development, Pierre Robin sequence, vascular malformations, velopharyngeal insufficiency

April Landry, MD
Assistant Professor, Emory University School of Medicine
Interest: airway disorders

New physicians:

Clarice Brown, MD
Assistant Professor, Emory University School of Medicine

Kara Prickett, MD
Assistant Professor, Emory University School of Medicine
Interests: airway reconstruction, head and neck masses, hearing loss, cochlear implants, thyroid disease

Sean Evans, MD
Assistant Professor, Emory University School of Medicine

Hearing loss and cochlear implant  404-785-7174  404-785-7113

Our services are available at several neighborhood locations throughout metro Atlanta. The appointment scheduler can assist families in finding the most convenient option. These locations are departments of Children’s at Scottish Rite hospital.

Forms and tools
Forms

AccessCHOA

Reminder: The fastest way to submit your order or referral is electronically, using accessCHOA.

AccessCHOA is the web-based interface for the Children's electronic health record system. It can be used to place an order for outpatient diagnostics and rehabilitation as well as for referrals to Children’s Physician Group specialists*. To learn more, see Page 4 of this guide or go to the Tools section for a tip sheet on using accessCHOA.

If you are not connected to accessCHOA, some online referral forms and order forms can be submitted electronically at choa.org/md.

Our forms

Children’s Physician Group:
• Provider referral form
• Orthopaedics and sports medicine patient referral form
• Rheumatology guidelines and referral form
• Synagis enrollment form

Cardiac:
• Pulmonary Hypertension Clinic referral form
• Sibley Heart Center Cardiology referral form

Child advocacy: Stephanie V. Blank Center for Safe and Healthy Children request for services form

Concussion: Downtime mild traumatic brain injury and concussion assessment criteria tool

Laboratory: Outpatient requisition form

Neurophysiology: EEG order form

Radiology
• Advanced pediatric imaging form
• Interventional radiology form
• Pediatric imaging form

Rehabilitation: Rehabilitation services order form

Sleep: Sleep disorders laboratory order form

Sports medicine: Order form

*This does not include the Stephanie V. Blank Center for Safe and Healthy Children or Sibley Heart Center Cardiology forms. These forms must be faxed.
Complete this form and fax it to 404-785-9111. Use one form for each patient.

If the patient needs to be seen within the next week, call 404-785-DOCS (3627) and do not fill out this form.

- Villa Rica: 705 Dallas Highway, Suite 301, Villa Rica, GA 30180
Below is a list of guidelines to follow when referring a patient to Children’s Physician Group–Rheumatology for a consultation. These are meant to be general guidelines. If you have specific questions, call 404-785-DOCS (3627) and ask to speak with the on-call rheumatologist.

### Conditions treated
- Ankylosing spondylitis
- Behçet’s disease
- Chronic recurrent multifocal osteomyelitis (CRMO)
- Granulomatosis with polyangiitis (Wegener’s)
- Juvenile dermatomyositis
- Juvenile idiopathic arthritis (JIA)
- Microscopic polyangiitis
- Mixed connective tissue disease
- Morphea/localized scleroderma (in conjunction with dermatology)
- Periodic fever syndromes
- Psoriatic arthritis
- Polyarteritis nodosa
- Sarcoidosis
- Sjögren’s syndrome
- Systemic lupus erythematosus
- Systemic sclerosis/scleroderma
- Uveitis (along with ophthalmology)

### Urgent referrals
If you feel your patient needs to be seen immediately, denote “urgent” on the rheumatology referral form. All referrals marked “urgent” are triaged to help make sure patients are seen in a timely fashion. If you wish to speak to the on-call pediatric rheumatologist, call 404 785 DOCS (3627). Generally, conditions that may warrant an urgent initial outpatient visit include, but are not limited to:
- Persistent joint swelling (chronic arthritis is defined as ≥6 weeks) without antecedent trauma. Starting an NSAID such as ibuprofen or naproxen may be warranted. We do not advocate giving these patients oral steroids prior to the initial consultation visit, as they may obscure alternative diagnoses and signs of arthritis.
- Significant joint contractures affecting function.
- Joint pain and swelling with persistent fevers (>101° F) without infectious or oncologic etiology.
- A persistent malar rash with mild cytopenias, signs of serositis (pleural effusion on X-ray or pericardial effusion on ECHO) or mild proteinuria (send first morning urine protein: creatinine).
- A dermatomyositis rash (i.e., persistent pink scaly papular rash over MCPs, PIPs, elbows, and/or knees, or malar rash) with signs of weakness or elevated muscle enzymes (i.e., AST, ALT, CK or LDH).

### Non-urgent referrals
There are several conditions we see that may not warrant an urgent evaluation given the available resources. These may include the following:
- Chronic pain with sleep disturbances, fatigue, diffuse joint or muscle pain with normal exam, and normal CBC and acute phase reactants do not require an urgent appointment. These patients can be managed by the primary care provider with counseling or by the pain service if severe. A positive ANA test without other symptoms, exam findings or abnormal labs (i.e., CBC, ESR, CRP, CMP, urinalysis, muscle enzymes, TSH or free T4) does not change this recommendation.
• Children with musculoskeletal pain but no signs of inflammation (i.e., swelling, warmth or decreased range of motion) seldom have a chronic rheumatic condition, even if they have a positive ANA test. Consider X-ray to evaluate for fracture, cancer and consider trial of NSAIDs, physical therapy and increased physical activity. Children with prolonged episodes of intermittent leg pain at night with normal daytime activities and normal studies (i.e., CBC, ESR, CRP or X-ray) usually have “growing pains” and do not necessarily need a rheumatologic evaluation.

• Raynaud’s phenomenon is a common complaint in tall, thin teenage girls in winter months. Most of these patients—as long as they do not have other concerning symptoms or exam abnormalities—have primary Raynaud’s phenomenon and no underlying rheumatic disease. Labs that are helpful in evaluating these patients and could be obtained prior to referral include: CBC with differential, ESR, CRP, CMP, ANA IFA and anti-phospholipid antibodies. Make sure patients keep core and extremities warm by wearing warm gloves and socks, and by using heat packs.

• Abnormal lab findings, such as a positive ANA or positive rheumatic factor at a low titer, in the absence of objective clinical findings usually do not require rheumatologic evaluation.

Conditions seen by other specialists
There are some conditions that may warrant the expertise of other specialties, even though joint pain might be one of their manifestations.

• **Fibromyalgia/amplified musculoskeletal pain syndrome**: For patients with chronic widespread pain where you suspect fibromyalgia, make a referral to the Pain Relief Clinic as well. The wait is often long for these patients. If they wait to see rheumatology before a referral to the Pain Relief Clinic is made, they will wait even longer to be seen in the Pain Relief Clinic. Our primary role is to exclude a rheumatic disease that might be present concomitantly.

• **Non-inflammatory connective tissue disorders** (i.e., Ehlers Danlos syndrome or Marfan’s syndrome): Refer to the Genetics Clinic. Also consider a cardiology evaluation to screen for cardiac manifestations of connective tissue disease.

Referrals and medical records
**All referrals marked “urgent” are triaged to help make sure patients are seen in a timely fashion.** The on-call rheumatologist is available to discuss any case or concern by calling 404-785-DOCS (3627). A rheumatology referral form is available to aid in communication of clinical data.

• Non-urgent referral requests should be faxed to 404-785-9111.
• Urgent referral requests should be faxed to 404-785-9096.

Make sure all appropriate records are faxed to our office prior to the patient’s visit. This includes the office visit notes, imaging studies (i.e., X-rays or MRI) and lab results. If lab results are pending at time the records are faxed, send the complete results when available.

If the patient had imaging studies, ask the family to bring a CD with the images to their rheumatology appointment.

If the patient has already seen other specialists related to their symptoms (i.e., ophthalmology or orthopaedics), send these records to us as well.
Children’s Physician Group—Rheumatology

Referral form

☐ Non-urgent referrals: Fax this form to 404-785-9111.
☐ Urgent referrals: Fax this form to 404-785-9096. Call 404-785-DOCS (3627) if you would like to discuss this case with the on-call rheumatologist.

__________________________
Today’s date

Checklist:
☐ Fax all appropriate records to our office prior to the patient’s visit. This includes office visit notes, imaging studies (X-rays, MRI, etc.) and lab results. If lab results are pending at the time records are faxed, make sure the completed results are sent over when available.
☐ If the patient had imaging studies, ask the family to bring a disc with the images to their rheumatology appointment.
☐ If the patient has seen other specialists related to their symptoms, send these records to us as well.

Patient’s name: _____________________________________________

Patient’s date of birth: _____________________________________________

Patient’s gender:  □ Male    □ Female

Parent/guardian’s name: __________________________________

Cellphone: ___________________________  Alternate phone: ___________________________

Interpreter required:  □ Yes    □ No   Language requested: ___________________________

Referring provider’s name: __________________________________

Referring provider’s status with patient:  □ PCP    □ Not PCP

PCP name: ___________________________  PCP phone: ___________________________

Reason for referral (check all that apply):
☐ Joint pain and swelling  □ Muscle weakness  □ Recurrent fevers   □ Rash
☐ Uveitis  □ Abnormal labs    □ Other: ___________________________

Did you send relevant labs pertaining to this referral?  □ Yes    □ No
  - If yes, are the results included with this form?  □ Yes    □ No
  - If yes, are any lab results still pending at this time?  □ Yes    □ No
  - List labs that are still pending: ___________________________

Were imaging studies performed (X-ray, ultrasound, CT, MRI)?  □ Yes    □ No
  - If yes, are the results included with this form?  □ Yes    □ No
  - Have the patient bring a CD with images if they were not performed at a Children’s Healthcare of Atlanta facility.

Did another physician or specialist recommend this referral?  □ Yes    □ No
  - If yes, have all relevant clinic notes, labs and/or imaging study reports from the specialist been faxed?  □ Yes    □ No
  - If you do not have records from the specialist, provide the following:
    Specialist name: ___________________________  Phone: ___________________________
**PLEASE Include a copy of insurance/Medicaid card and NICU discharge summary.**

Fax completed form with a copy of any progress notes / lab results / relevant information to:

404-785-3850
Attention: Intake Coordinator

Referral information can also be emailed to cpcintake@choa.org.

Call Intake Coordinator at 404-785-3833 if you need confirmation that the faxed or emailed referral has been received.

### Date of Exam:
- Initial
- Second
- Third
- Fourth
- Additional

### Injury Assessment

1. Complete Neuro Exam including Glasgow Coma Score:

2. **Abnormal** Physical findings?
   - a. Is there evidence of a forcible blow to the head (direct or indirect)?
   - b. Is there evidence of intracranial injury or skull fracture?
   - c. Location of Impact:
     - Frontal
     - Left Temporal
     - Right Temporal
     - Left Parietal
     - Right Parietal
     - Occipital
     - Neck

3. **Cause:**
   - MVC
   - Pedestrian-MVC
   - Fall
   - Assault
   - Sports (specify)
   - Other

4. Was the injury witnessed or un-witnessed?
   - Witnessed
   - Un-witnessed

5. **Amnesia:**
   - BEFORE (Retrograde) Are there any events just BEFORE the injury that you/ your child have no memory of (even brief)?
   - AFTER (Anterograde) Are there any events just AFTER the injury that you/ your child have no memory of (even brief)?

6. **Loss of Consciousness:**
   - Did you/ your child lose consciousness?
   - Yes, how long?
   - No

7. **EArLY SIGNS:**
   - Appears dazed or stunned
   - Is confused about events
   - Answers questions slowly
   - Repeats questions
   - Forgetful (recent info)

8. **Seizures:**
   - Were seizures observed?
   - Yes
   - No

### Check all that apply (symptoms are subjective)

Plan name: _______________________________________    Precert number (if required): _____________________________

Insurance card number: ____________________________    Group number: ________________________________________

2nd Insurance: ____________________________________

Diagnosis code/ description: ____________________________

It is the responsibility of the ordering physician's office to obtain all precerts/ authorizations.  It must be faxed to our office 1 week prior to appointment

The interpretation fee is billed separately from the hospital technical fee.  Please include in pre-certification.

Test(s) Requested:

□ EEG (Electroencephalogram) CPT 95819     □ ERG (Electroretinogram) CPT 92275

□ Ambulatory EEG CPT 95953    □ 24 hr    □ 48 hr  

Date of Last EEG ____________________________

□ Pyridoxine B6 Injection  CPT 90772

□ Dense Array w/Spike Detection 95951 & 95957

□ EMG (Electromyogram)  CPT 95860-75

Instill eye drops during ERG as follows, per neurophysiology policy 2-12

Patient Instructions For EEG (Please review with parents):

1. Your child needs to sleep during part of the test. Children over 24 months should be kept awake at least 2 hours later than their normal bedtime the night before the test and awakened 2 hours earlier the day of the test. Do not allow your child to nap the day of the test. We do not sedate for this test. Study typically takes 1 to 1 ½ hours.

2. The patient must have clean hair, no oils, gels or lotions.

3. No refined/processed sugars or caffeine for 24 hours before exam (natural sugars are acceptable).

4. Patients must arrive 15 minutes prior to appointment to register in the Registration/Admissions Dept. - 1st floor. If the patient is 15 minutes late prior to appointment time, patient will be cancelled.

Preference for physician for EMG study:

□ Children's Pediatric Neurology Practice

□ Children's Rehabilitation Associates at Children's Healthcare of Atlanta

Children’s Healthcare of Atlanta
Sleep Disorders Laboratory Order Form

Please print clearly

Child’s name: _____________________________________     Sex: □ M □ F     Child’s DOB: _____________

Children’s MRN (if known): ____________________    Parent/Guardian’s Name: ________________________

Address: ______________________________________________________________________________________________

Primary phone: __________________ Alt. Phone: __________________    Email: ______________________________

Preferred language: English__     Spanish ___      Other: ____________________________

Ordering physician: ___________________________    Office Phone: __________________    Fax: ___________________________

Primary care physician (if not the ordering physician): _______________________________________________________

Source: □ Office □ TDPC □ Craniofacial □ MDA □ Sickle cell □ Other: ____________________________

Previous study: □ No □ Yes    If Yes: □ Children’s Healthcare of Atlanta □ Other: ____________________________

Reason for study: _______________________________________________________________________________________

List signs/symptoms, do not use “rule out,” “probable,” “suspected,” etc.

ICD-10 Code (sleep related; required)    Check all that apply: □ R06.83 (snoring)     □ G47.33 (obstructive sleep apnea)
□ G47.36 (hypoxemia)    □ other(s) __________________________

Other medical problems: □ Down Syndrome □ ADHD □ Autism □ Sickle cell □ Tracheostomy □ Obesity

Insurance company: __________________________________________     Group/ID #: ____________________________

Pre-certification/authorization number: ____________________________________________________________________

If pre-certification is required by insurance, please obtain and fax the authorization to us no later than one week before the test date.

Evaluation Requested: (for explanation, visit choa.org/sleep or call us)

□ Nocturnal Polysomnogram (CPT code 95810 if > 6 yrs or 95782 if < 6 yrs of age)
    This is a complete overnight study that includes sleep staging and respiratory parameters
    □ Check here if you would like us to order O2 (if needed) and provide consultation/follow up
    □ Cardiology patients: Provide the child’s baseline/expected SpO2 ______________

□ CPAP or Bi-level PAP titration (CPT code 95811 if > 6 yrs or 95783 if < 6 yrs of age)
    CPAP/BPAP titration order form required; a sleep medicine or pulmonology consult is recommended

□ Multiple Sleep Latency Test (MSLT) (CPT code 95805)
    Nap study for narcolepsy; must also order the Nocturnal Polysomnogram above
    A sleep medicine consult is required before an MSLT unless previously evaluated by a neurologist

Special study requests and/or special needs of the child: _______________________________________________________

_____________________________________________________________________________________________________

_____________________________________________________________________________________________________

We will schedule the study at the Children’s Sleep Laboratory that is best for the family and the parameters requested:

    Egleston Sleep Center    Satellite Boulevard Sleep Center    Scottish Rite Sleep Center

Interpreting group for this study (each of our sleep specialists can interpret studies performed at any location):

□ Children’s Physician Group–Sleep (Egleston-based physicians: Roberta Leu, Daniel Torrez)
□ Children’s Physician Group–Sleep (Scottish Rite-based physicians: Gary Montgomery, Sophia Kim)

The ordering physician must choose the interpreting group and send clinical notes before we can schedule the study.

Ordering physician signature: ___________________________     Date: ___________________________

Please print name clearly: __________________________________________

Fax this form and history/clinical notes to 404-785-2211

Questions: Contact Central Scheduling at 404-785-2974 or sleepcenterschedulingoffice@choa.org

Revised 08/2018    CPT Codes as of 2015    Visit choa.org/sleep for more information or to print additional forms.

Getting started

What is accessCHOA?

accessCHOA is a tool that provides real-time web access to patient information, comprised of different web pages or activities that correspond to different tasks. The activity that you use depends on what you want to accomplish. For example, if you want to see detailed information about a patient’s lab results, you can use the Results Review activity.

This tip sheet includes information to help you get started, including browser requirements, and how to log in and log out. Each section contains information on how to accomplish the task, along with a picture of the activity for quick reference. Note that these images may differ slightly from what you see when you are using accessCHOA.

Browser, system and connection requirements

We strongly recommend a high-speed internet connection for optimal performance. Your browser must be Java enabled, and you must use one of the following internet browsers to use accessCHOA:

- Microsoft Internet Explorer 8.0 and 11.0 (for Microsoft Windows platforms)
- Mozilla Firefox 3.0 (for Microsoft Windows platforms and Mac OS X platforms)

You also need a minimum screen resolution of 1024x768 pixels, and Adobe Reader must be installed to view documents.

Why use accessCHOA?

This web application is designed to extend continuity of patient care by providing community physicians secure access to select patient information in the patient’s medical record. Typical users are physicians, physician assistants, nurse practitioners, nurses and office staff who require access to patient clinical, demographic and insurance information at Children’s.

Users must complete several steps to gain secure access to accessCHOA.

1. Identify individuals in your practice who will require access to accessCHOA. Note that you must identify any physician or provider for whom you would like to see patient information.

2. Include all users who will need access to accessCHOA on the New Practice Request Form at accesschoa.org. Be sure to complete all required information.
   - Complete the contact information section at the top of the form.
   - Enter the first name, middle initial, last name, job title and/or practice role of each office staff member.
   - The last four digits of the Social Security number is a Children’s standard for creating Epic login IDs for each nonemployed individual who will access confidential patient information.
   - An email address must be provided for each provider or other professional who will use accessCHOA. The email address is used to return the users’ login information, and can also be used to notify users of certain patient events, such as a new lab result or admission.
3. Once all information is complete, submit the New Practice Request Form using the “Submit” button at the bottom of the form. Once the practice and users are approved, an email with the user’s login information is generated and sent to each user.

4. Go to accesschoa.org to sign in to the web application.

Note: First-time users are asked to accept the Terms and Conditions. Click “Accept.”

**How do I log in?**

1. Enter the following URL: accesschoa.org
2. Enter the “User ID” that you received in your welcome to accessCHOA email in the User ID field.
3. Press “Tab” to move to the password field. Enter the password that you received in your welcome to accessCHOA email.
4. After you have entered your user ID and password correctly, press “Enter,” or click the “Log In” button.
5. You will be prompted to change your password, which is required.
6. When the Terms and Conditions page appears, read the agreement and click “Accept” to acknowledge your agreement with the terms. You are now logged in to accessCHOA.

Note: Terms and conditions will appear when they are updated and on an annual basis.

7. You may be prompted to identify a department when logging in to accessCHOA.
   If you see this screen, click on the magnifying glass,

   ![Image of a login screen](image.png)

   and choose the accessCHOA department.

   ![Image of department selection](image.png)

   If this is the most common way you log in to the system and would like to have accessCHOA as your default department, contact us at 404-785-6767 and we can make that change for you.

Note: If you see patients at our facilities and log in to “hyperspace,” any changes to your default department in accessCHOA will change your department there as well.
How do I log out?

To maintain patient confidentiality, you need to log out, or use a secure screen when finished or leaving the computer for any reason. There are two ways to do this:

1. Click ![Log Out] to log out of accessCHOA. The next time you log in, you are directed to your start page.

2. Secure the computer by clicking ![Secure]. When you log back in, you are returned to the same page you were using before securing the screen. There is no need to navigate back to the page you were previously working on.

Show time-out warning

After 20 minutes of inactivity, your accessCHOA session will time out. If your session is about to time out, a warning message appears in the application banner. Until you perform an action, such as clicking on a page or typing, the session times out.

What if I forget my password?

See your site administrator or call the solution center at 404-785-6767.

Help and contact information

For help using an activity, click ![Help] on the web page.

Additional tip sheets can be found within the accessCHOA application on the training page.

Contact the Children’s Solution Center at 404-785-6767 if you have any questions or concerns.
Referring patients to a Children’s Emergency Department

Children’s Healthcare of Atlanta believes effective communication between community urgent care physicians and our Emergency Department physicians is an important part of our shared goal to provide high-quality care to our patients. Before you transfer a patient, review the following information. This will help you and patient families better connect with our services. Do not send patients to the Emergency Department if they do not have a true emergent need.

If you feel as though your patient warrants a direct admission, call the Transfer Center and discuss the case with the hospitalist on call. The patient may be able to bypass a trip to the Emergency Department depending on the complaint, acuity, the work-up that has already been completed and the comfort level of the admitting team.

Step 1: Call the Transfer Center at 404-785-7778 or 888-785-7778.

We need to know:

• The patient’s name, date of birth and sex.
• The patient’s complaint and any other relevant medical, personal or other history.
• The patient’s lab results. Send copies of all labs or verbally detail the lab values.
• Relevant work-up that has been completed for the patient. The Emergency Department physician will review this information to avoid any duplication.
• Whether the patient needs air or ground transportation.
• Your cell phone or after-hours contact information for the Emergency Department physician to use if they have questions regarding the patient; direct cell phone numbers are preferred rather than practice numbers, because patient arrival and work-up times may take place after hours.
• Whether you would like updates on your patient.

Step 2: Decide if you need to speak to an Emergency Department physician regarding an emergent patient.

We need to know:

• Your preferences or concerns regarding the patient.
• Your patient’s specific symptoms and the disease process(es) you are concerned about.

Direct communication can help us better understand your specific concerns and your desired outcome for the visit. This may help to increase efficiency, enhance the patient experience and reduce unreasonable expectations.

Step 3: Advise the parents/guardians on next steps.

• To help set proper patient family expectations, advise families that they may not see a specialist in the Emergency Department. The Emergency Department physicians will determine if the patient’s condition requires an immediate evaluation by a specialist. This is often not required. Emergency Department physicians will also determine if the patient needs diagnostic testing, admission, etc.
• Tell them to keep the child NPO if you anticipate there may be a need for sedation or anesthesia.
• They can download the Children's mobile app to get step-by-step directions to a Children’s Emergency Department. This free app can be downloaded on a mobile device by searching for Children’s Healthcare of Atlanta on Google Play or the App store. Visit choa.org/app to learn more.
• Have them call 404-785-KIDS (5437) if they have questions or need to reach their child's room after they have been admitted.

Following up on patients

• Check accessCHOA for updates on your patient, or visit the physician portal to review clinical guidelines.
• If you need an update on a patient while he is in the Emergency Department, call the Transfer Center at 404-785-7778 or 888-785-7778. Representatives will attempt to connect you with the patient’s Emergency Department care provider.
Leadership team contacts
We’re here to help. Contact us if you need to connect with our leadership team regarding the Emergency Department.

Primary contacts
Reena Blanco, MD, Medical Director, Emergency Medicine at Egleston hospital
reena.blanco@choa.org

Mark Griffiths, MD, Medical Director, Emergency Medicine at Hughes Spalding hospital
mark.griffiths@choa.org

Jim Beiter, MD, Medical Director, Emergency Medicine at Scottish Rite hospital
james.beiter@choa.org

Srikant Iyer, MD, Chief, Emergency Services
srikant.iyer@choa.org

For unresolved issues, contact our campus medical directors:
- Scottish Rite: Michael Mallory, MD

- Egleston: Stephanie Jernigan, MD
  stephanie.jernigan@choa.org
- Hughes Spalding: Lynn Gardner, MD
  lynn.gardner@choa.org

Frequently asked questions
At Children’s, we are committed to helping physicians experience a smooth transition from patient care in our system through discharge to the patient’s primary medical home.

Q: What is the difference between the Transfer Center and 404-785-DOCS (3627)?
A: The Transfer Center, 404-785-7778, assists physicians and outside facilities with transfers into our system. The Transfer Center helps with emergent patients, transport needs and consults on patients who need immediate or real-time interventions and guidance.

Our main physician line, 404-785-DOCS, is not for Emergency Department patients. This contact number helps you connect to Children’s services for non-urgent reasons during business hours without having to remember multiple numbers.

Q: Will I be contacted once my patient is discharged?
A: Yes. You will receive notification of patient discharge through fax. We are aware that this process needs improvement and will continue to look for ways to improve communication, specifically related to notifications of patient death. We welcome your feedback on how we can address your important concerns.

Q: How can I help make sure that I get an update about my patient?
A: Notify the Transfer Center that you would like an update from the emergency physician and be sure to leave your direct cell phone or after-hours phone number where you can be reached. On average, it takes patients two to three hours to arrive at the Emergency Department following your referral. Evaluation and test results may take an additional two hours.

Q: What if my patient wants to go to the Emergency Department because they need a diagnostic test or want to get in sooner to see a specialist?
A: We realize that many patient families do not wish to wait for their appointment with a specialist or want to complete a diagnostic test after hours. These nonemergent visits to the Emergency Department affect our efforts to provide care and efficient service. We are working to centralize referrals and reduce Children’s Physician Group wait times. We are growing our offerings in many key specialty areas and are providing single points of contact for patients and physicians to improve patient access. We continue to rely on your support to help patient families appropriately utilize the Emergency Department.

Visit the Children’s Physician Portal at md.choa.org for clinical guidelines and resources.
Pediatric endocrinology and obesity

A physician’s quick guide to helping children with obesity

At Children’s Physician Group–Endocrinology and Strong4Life, our goals are to diagnose pathological causes of obesity and manage endocrine complications of obesity. This document provides a synopsis of endocrine problems that commonly arise in general pediatric management of obesity.

Etiology of obesity

Short stature or slow growth velocity in a growing obese child is a red flag for a pathological cause. Obesity onset before age 5 is typical in children with a monogenic cause of obesity. However, only 5 percent of children with early onset obesity have a known genetic case.

Common conditions

Cushing syndrome

This can be difficult to diagnose. Look for features beyond obesity and striae, including short stature, hypertension, proximal limb muscle wasting or weakness, and diabetes. The overnight dexamethasone suppression test is used to evaluate the risk of Cushing syndrome.

- One dose of 15 mcg/kg (max 1 mg) dex po at 11 p.m., and check cortisol the following morning between 7 a.m. and 9 a.m.
- Cortisol should be <2.0 mcg/dL.

Diabetes

- Screen for diabetes every three years in asymptomatic, obese children ages 10 to 19 years old with a family history of Type 2 diabetes, high-risk race or signs of insulin resistance. There is no agreed upon best test (fasting glucose, random glucose, HbA1c).
- Insulin levels do not effectively predict future Type 2 diabetes.
- Apart from lifestyle management, there is no approved therapy for children with prediabetes. Patients with prediabetes that persists after a serious effort to manage lifestyle for greater than six months may benefit from metformin treatment or an endocrine consult.

- A diabetes education consultation or a referral to Strong4Life can be arranged through Children’s Healthcare of Atlanta for children with prediabetes.

High LDL cholesterol

- Ensure a fasting sample was obtained.
- Take an average of two samples drawn two to 12 weeks apart when patient is not acutely ill.
- Check for primary disease-causing high LDL cholesterol (i.e., fasting CMP, TSH and urinalysis).
- For moderate elevation (130-189 mg/dL), lifestyle management is recommended for all patients. If no response within six months, evaluate for the following risk factors:
  - Hypertension
  - Smoking
  - Diabetes
  - Nephrotic syndrome
  - Renal failure
  - Renal transplant
  - History of Kawasaki disease
  - HIV
  - Chronic inflammation
  - Cancer survivor
  - Family history of premature cardiovascular disease
- If a high-risk factor is present, the child may benefit from lipid clinic consult.
- If LDL ≥190 mg/dL, a referral to the lipid clinic is recommended irrespective of risk factors present.
High-fasting triglycerides
High triglycerides with low HDL cholesterol is common in obese children. Children with severely low HDL (<20 mg/dL) may benefit from a lipid clinic consult.
• Ensure fasting sample was obtained.
• Take an average of two samples drawn two to 12 weeks apart when patient is not acutely ill.
• Check for primary disease-causing high triglyceride (i.e., fasting CMP, TSH and urinalysis).
• Abnormal levels that are <300 mg/dL may respond to lifestyle management plus or minus fish oil.
• Levels >300 mg/dL may benefit from a lipid clinic consult.

Polycystic ovarian syndrome (PCOS)
Normal variations in adolescents can make a PCOS diagnosis difficult using standard criteria. Minimum requirements for diagnosis include:
• Irregular or absent ovulation
• Clinical signs of high androgens (e.g., hirsute and severe acne)

Differential diagnosis of adrenal disease or an ovarian tumor can be evaluated with minimal investigation.
• 17-hydroxyprogesterone
• Free testosterone
• DHEA-S
• TSH
• Fasting complete metabolic profile
• Fasting lipid profile
• hCG (urine or serum)
• ± 25 (OH) vitamin D

A combined oral contraceptive pill (OCP) is the first line of therapy. Use OCP with low androgen activity. Consider the risk for thrombosis before starting oral contraceptive. Metformin is used by some, but it is not a Food and Drug Administration (FDA)-approved indication.

Evaluating complications of obesity

Thyroid function testing
• If initial thyroid-stimulating hormone (TSH) is high but <9 uIU/mL, palpate thyroid gland and repeat TSH and Free T4. Get thyroid peroxidase autoantibody (TPO) and antithyroglobulin autoantibodies.
• If there is no goiter, TSH remains minimally elevated and autoantibodies are both negative, TSH should return to normal after weight loss is achieved.
• If there is a goiter present, TSH rises above 9 uIU/mL or either autoantibody is positive, a referral to endocrinology is indicated.

Contact us
Call 404-785-DOCS (5437) to make a referral or for a physician-to-physician consult.
Visit choa.org/md for more information and to access our online referral form.
Primary care guideline for new onset seizure

First-time unprovoked nonfebrile seizure assessment

The recommendations in the following guideline do not indicate an exclusive course of treatment. The intent is to build a multifaceted system of care for pediatric patients and provide a framework for clinical decision-making.

Health history is key in determining if a seizure has occurred and if it is the first episode. History should be as detailed as possible and given from a reliable observer. This will help determine what further evaluation is necessary.

Documentation should include:

History
- Age
- Family history of seizures
- Developmental status
- Behavior
- Health at seizure onset (fever, illness, exposures to illness, sleep)
- Past medical history
- Precipitating events other than illness (trauma, toxins, ingestions)

Seizure characteristics
Detailed description of all aspects of the seizure, including:
- Aura (subjective)
- Behavior (mood or behavior changes prior to onset)
- Vocal symptoms (cry, speech changes)
- Motor symptoms, including, but not limited to:
  - Head or eye movements
  - Posturing
  - Automatisms (lip smacking, finger rolling)
- Generalized or focal movements
- Respiratory symptoms (change in pattern or cyanosis)
- Autonomic symptoms (drooling, incontinence, pallor, vomiting)
- Decrease or loss of consciousness
- Duration of the seizure

Symptoms following seizure
- Amnesia
- Confusion
- Lethargy
- Sleepiness
- Headaches
- Muscle aches
- Transient focal weakness
- Nausea or vomiting

In addition, a complete physical exam, a complete neurologic exam should be performed and documented.

Lab evaluation
For patients younger than 6 months old, there is some evidence to support lab screening in the absence of specific suggested features. For patients older than 6 months old, routine lab screens are not recommended for first nonfebrile seizures without suggestive history or symptoms. Suggested lab screens include serum electrolytes, including calcium and magnesium.

Lab tests should be ordered based on the patient’s clinical characteristics and history, such as vomiting, diarrhea, dehydration or persistent abnormal mental status.
- If there is any concern for drug exposure or abuse, perform a toxicology screening.
- If case suggests meningitis or encephalitis, perform a lumbar puncture.
**Electroencephalogram (EEG)**

An EEG is recommended as part of the evaluation for all children with a first-time unprovoked nonfebrile seizure to determine seizure classification and epilepsy syndrome.

**Diagnostic imaging**

The goal of the initial imaging is to try to classify the seizures as focal or generalized.

Many generalized seizures have focal onset, which is often missed but frequently associated with focal epileptiform on an EEG, therefore will be classified as a focal seizure with second generalization.

Emergent neuroimaging is indicated for children with persistent postictal neurological deficits or for abnormal mental status persisting for several hours after the seizure. Request an urgent neurology consult.

Nonemergent imaging is indicated in children with abnormal development and/or a history of abnormal neurological examination if neuroimaging has not been done before. Nonemergent imaging is an MRI of the brain.

After the second seizure or focal seizure, a nonemergent MRI is always indicated. Children of all ages are possible candidates for neuroimaging.

**Diagnosis**

Identify the diagnosis

- Dx1 seizure type: focal or generalized
- Dx2 epilepsy syndrome (remote): can be either symptomatic or genetic
  - Symptomatic: Focal lesion on imaging, intellectual disability, neurological abnormality, etc.
  - Genetic (presumptive): Absence, juvenile myoclonic, benign rolandic epilepsy, positive family history, etc.

**Recurrence**

It is difficult to predict if a child will have a second seizure. Many children will not have a recurrence. Risk for seizure recurrence for developmentally normal children with normal imaging and EEG is 33 percent. Risk of seizure recurrence with an epileptiform EEG generally exceeds 70 percent.

**Treatment**

If the first seizure is status epilepticus (a seizure that lasts at least five minutes), consider initiating anticonvulsant therapy. Physicians may consider providing a prescription for rectal Diastat to be used for subsequent seizure lasting longer than five minutes. Remember to provide the guardian with seizure first-aid education, instructions on how to use Diastat and directions to call 911 the first time Diastat is given.

- The protocol for Diastat AcuDial is based on age and weight:
  - Ages 2 to 5: 0.5 mg/kg
  - Ages 6 to 11: 0.3 mg/kg
  - Ages 12 and up: 0.2 mg/kg

- Doses are available in 2.5 mg intervals, so dosages should be: 2.5, 5, 7.5, 10, 12.5, 15, 17.5 or 20 mg.

- Diastat cannot be in doses larger than 20 mg for any age.

- There is a smaller Diastat tip (4.4 cm) for smaller children (the larger tip is 7 cm).

- The syringes are available in 2.5 mg, 10 mg and 20 mgs (the pharmacist should lock the syringe at the appropriate dose; green ring will appear when this is done).

**Referral is indicated for:**

- Prolonged, focal or second seizures or developmental delay/neurodevelopmental disability
- Findings on initial workup indicating underlying etiology or true epileptic syndrome (developmental delay, abnormal neurological exam, abnormal neuroimaging or abnormal EEG)
- Patient or parental anxiety

Documentation of medical history and physical, including all indicated laboratory, neuroimaging and neurodiagnostic studies, should be provided to the consulting physician.

**References**

**Acknowledgments**

A special thanks to Kids Health First and Joann Janas, MD, for their original protocol development, which is evidence-based, therefore part of this guideline. Kids Health First has been using this protocol for several years and have experienced positive outcomes with managing their patients with their first-time unprovoked seizure.

This guideline was developed through the efforts of Children’s Healthcare of Atlanta and physicians on the Children’s medical staff in the interest of advancing pediatric healthcare. This guideline is a general guideline and does not represent a professional care standard governing providers’ obligation to patients. Ultimately, the patient’s physician must determine the most appropriate care.

If your patient has an emergent or life-threatening condition, stop and call 911, or send him to the nearest hospital emergency department.
Primary care guideline for new onset seizure

First-time unprovoked nonfebrile seizure assessment

1. Obtain a detailed history, physical and neurological exam

   **Seizure history:** Age, family history of seizures, developmental status, behavior, health at seizure onset, past medical history, precipitating events (other than illness)

   **Seizure characteristics:** Aura, behavior, vocal symptoms, motor, generalized or focal movements, respiratory symptoms, autonomic symptoms, decrease or loss of consciousness, duration of seizure

   **Symptoms following seizure:** Amnesia, confusion, lethargy, sleepiness, headaches, muscle aches, transient focal weakness, nausea or vomiting

2. Consider diagnostic testing

   **Lab testing**
   - Under 6 months old—lab screens of serum electrolytes including calcium and magnesium
   - Over 6 months old—lab screening not recommended unless suspected:
     - Drug exposure (toxicology screening)
     - Meningitis or encephalitis (lumbar puncture)

   **Neurophysiology**
   - Electroencephalogram (EEG)
     - This test is recommended for patients of all ages. Inform the patient’s family that a neurologist will review and interpret the EEG.
     - When ordering an EEG, write “NOS” or “new onset seizure” on the order form, and the test will be scheduled within three business days.
     - Visit choa.org/eegorderform to download the EEG order form.

   **Neuroimaging**
   - MRI
     - This test is only recommended for a second seizure.
     - When ordering an MRI, order one without contrast. Indicate the reason for the exam as “new onset seizure” or “NOS” on the order form.

   **Emergent imaging and neurology consult are needed if the patient has:**
   - Persistent postictal neurological deficits
   - Abnormal mental status persisting several hours after seizure
3. Identify diagnosis and treatment

**Identify diagnosis**
- Dx1 seizure type—focal or generalized (EEG can help classify)
- Dx2 epileptic syndrome—symptomatic (abnormal MRI or neurodevelopmental disability) or genetic (presumptive)

**Treatment**
- Prescribe the rectal gel Diastat as needed for recurrent seizure.
- Provide the guardian with seizure first-aid education (turn patient on side and keep track of how long seizure lasts), instructions on how to use Diastat (if the seizure continues longer than five minutes, give Diastat rectally) and directions to call 911 after using Diastat for the first time.

4. Determine need for referral to neurologist

**Referral is indicated for:**
- Prolonged or second seizure
- Developmental delay/neurodevelopment disability
- Initial workup finding underlying etiology or true epileptic syndrome
- Patient or parental anxiety

**Neurologists are available for consultations Monday through Friday.**
- 8 a.m. to 5 p.m.
- Phone: 404-785-DOCS (3627)

Documentation of medical history and a physical, including all indicated laboratory, neuroimaging and neurodiagnostic studies, should be provided to the consulting physician.

This guideline was developed through the efforts of Children’s Healthcare of Atlanta and physicians on the Children’s medical staff in the interest of advancing pediatric healthcare. This guideline is a general guideline and does not represent a professional care standard governing providers’ obligation to patients. Ultimately the patient’s physician must determine the most appropriate care.

If your patient has an emergent or life-threatening condition, stop and call 911, or send him to the nearest hospital emergency department.
