

The IRB is your BFF!

Qualities of a BFF

- They are emotionally supportive
- They listen to you and respond thoughtfully
- They go out of their way to help you
- They don't expect perfection
- They are therapeutic
- They help you navigate
- They have your back
- They tell you what you need to hear, even if it's not what you want to hear

What is the IRB?

- A committee charged with the review of human subjects research to assure that the rights and welfare of human participants are adequately protected.
- IRBs are required to have a diverse mix of scientific, non-scientific, and community members.

Emory IRB

CHOA IRB

Who is the IRB?

- Staff
- Compliance
- Board Members

Why do we have IRBs?

- Tuskegee Syphilis Study (1932-1972)
- Nazi War Crimes (1935-1945)
- Cold War Human Radiation Experiments (1944-1974)
- Milgram Studies of Obedience to Authority (1960s)
- Thalidomide Experiment (1962)
- San Antonio Contraceptive Study (1970s)

Why do we still have IRBs?

What guides IRBs?

- ◊ Food and Drug Act Established (1938)
- ◊ Nuremberg Code (1947)
- ◊ Declaration of Helsinki (1964)
- ◊ FDA Establishment of Regulations (1960s -1980s)
- ◊ National Research Act (1974)
- ◊ Belmont Report (1979)

Prep Work

- ◊ Training/Accounts
- ◊ Know which IRB to use
- ◊ Know the basics
- ◊ Know your forms

Training

- ◊ Children's Requirements

- ◊ CITI/GCP

- ◊ COI

- ◊ Emory Requirements

- ◊ Request an eIRB Account

- ◊ CITI/GCP

- ◊ EHSO

- ◊ COI

- ◊ Emory Research Management System (ERMS)

- ◊ Key Concepts/Clinical Research Training

Which IRB is your BFF?

- ◊ Emory
- ◊ CHOA
- ◊ Georgia Tech
- ◊ Georgia State
- ◊ Morehouse

The Basics

- Do I need to submit to the IRB?
- What type of review?
- Do I need to get consent?

Do I need to submit?

- Is it Research?
 - Systematic Investigation and Generalizable?
 - Using a drug or a device?
- Are Human Subjects involved?
 - Living Individual?
 - Obtaining data through intervention, interaction or obtaining PHI?

Non-Human Subjects Determination Form

Scenario 1

- A Pediatric Institute investigator is conducting a retrospective chart review looking at Children's records?
 - What if it's a CHOA investigator?
- Is it research? Yes
- Which IRB? A chart review limited to the review of Children's medical records should come to the CHOA IRB, regardless of PI affiliation.

Scenario 2

An Emory fellow is conducting a prospective chart review with patients at Children's?

-What if it's a Pediatric Institute investigator?

- Is it research? Yes
- Which IRB? A chart review limited to the review of Children's medical records should come to the CHOA IRB, regardless of PI affiliation.

Scenario 3

A CHOA investigator is receiving de-identified data set from IS&T to conduct a study to determine if kids with asthma were more likely to have severe flu symptoms?

-What if it's an Emory investigator?

- Is it research? Yes, but not research with human subjects (i.e., no identifiable data and no interaction with subjects)
- Which IRB? For NHSR determinations, you can submit to either IRB, neither IRB or both IRBs. We suggest submitting to at least one IRB for an official determination.

Scenario 4

A CHOA investigator is doing a case report on 6 patients?

-What if it is a case report on 2 patients?

- Is it research with 6 subjects? At Emory yes. For CHOA, it depends...
- Is it research with 2 subjects? At Emory no. For CHOA, it depends but it is highly unlikely that we would call a 2 patient case study research.

Scenario 5

A Pediatric Institute investigator is conducting a federally funded clinical trial at Children's?

-What if the study is industry sponsored?

- Is it research? Yes
- Which IRB? Emory if it's federally funded, Children's if it's industry sponsored.

Scenario 6

An Emory physician needs to treat a CHOA patient with an Emergency Use drug?

- Is it research? No, but it still requires submission to the IRB.
- Which IRB? Emergency Use cases should go to the IRB at the facility where the patient is receiving the investigational drug or device.

Other Levels of Review

- Exempt
- Expedited
- Full Board

Do I need to get consent?

- Your study may be eligible for a waiver if:
 - No greater than minimal risk
 - Will not adversely affect rights and welfare
 - **Could not practicably be carried out without the waiver**

How long does it take?

Type of Review	Turnaround Time (Days)
NHSR Determination	2
Exempt	4
Expedited	4
Full Board	29

The Forms

- Initial Submission Form (current) eIRB Submission (Jan 2019)
- Protocol Template
- Consent Template/HIPAA Authorization Form
- Assent Template
- IRB Authorization Acknowledgement Form

Other Forms

- ◊ Continuing Renewal
- ◊ Amendment
- ◊ Event Reporting
- ◊ Non-Compliance

Closing a Study

- Closed to enrollment ;
- Subjects have completed intervention/data collection; AND
- All data collection and analysis of identifiable information has been completed.

Helpful Hints

- Contact the IRB early in the process
- Contact the IRB with questions in the application
- Ask all potential study staff to confirm training is up to date
- Make sure consent and protocol are consistent
- Respond to IRB requests quickly, but not too quickly
- Let us know if you have a deadline
- Don't save IRB forms to your desktop for repeated use
- Only list one PI

Takeaways

- Make the IRB your BFF
- Have a basic understanding of what doesn't need to be submitted to the IRB
- Know which IRB to submit to
- Know when to close your study
